INTRODUCTION

The Energy Research Information System (ERIS) is a service administered by the Old West Regional Commission in response to the need for current information on research activities in the Region's rapidly growing and changing field of energy. Cooperating with the Commission on ERIS is the U.S. Bureau of Land Management, EMRIA program (Energy Minerals Rehabilitation Inventory and Analysis).

The purpose of ERIS is to compile and make available to the energy research users of the Region an up-to-date inventory of ongoing and recently completed energy-related research projects. By providing researchers with a means of communication with other researchers and allowing government and policy decision-makers access to Regional energy research, ERIS aims to improve communication channels among energy research users. Use of the system can be an aid in conducting research assessments, avoiding duplication, and pinpointing areas of additional research need.

ERIS Scope

The term "energy-related" covers a broad spectrum of activities and encompasses a large volume of research. Nonetheless, ERIS attempts to report energy-related research projects in as comprehensive a manner as possible. This includes reclamation, energy conversion, and land use research, socioeconomic impact and alternate energy resource studies, as well as programs related to energy development which do not necessarily involve research. The geographic focus of ERIS is upon research conducted in the Old West Region states - Montana, Nebraska, North Dakota, South Dakota and Wyoming.

The compilation of energy research projects in the ERIS reports has been accomplished by combining ERIS's own information-gathering efforts with those of other clearinghouses - most notably, Oak Ridge National Laboratory's *Inventory of Current Energy Research and Development*, the Smithsonian Science Information Exchange, the Montana Energy Office, North Dakota Regional Environmental Assessment Program, and the other various energy agencies of the states of the Old West Region.

Use of the Energy Research Information System

ERIS Reports

ERIS information is stored in a computerized data base. As the data base grows, periodic reports are printed which list the latest contents of the data base. The first such report was issued in November, 1975.

Access to ERIS information is available through subject-oriented chapters and through the indexes located at the end of the reports. These indexes are: Location, Personal Name, Organization, and Subject. Instructions for the use of the indexes precede each section. The indexes are cumulated annually.

The diagram on the following page further describes how ERIS is organized.

Computer Search Service

The holdings of ERIS are computerized, allowing for flexibility in conducting special searches

of the data base. The computer search service is offered as a complement to the ERIS reports. If your inquiry concerning energy research cannot be answered by manual use of the reports, contact a member of the ERIS staff and request that a special search be conducted.

Please direct your inquiries to: ERIS, Old West Regional Commission, 228 Hedden-Empire Bldg., Billings, Mt 59101. 406-657-6665 (commercial) or 585-6665 (FTS).

* * * * * * * * * *

The Old West Regional Commission is a Federal-State partnership designed to address regional economic problems and stimulate orderly economic growth in the states of Montana, Nebraska, North Dakota, South Dakota and Wyoming. Established in 1972 under the Public Works and Economic Development Act of 1965, it is one of eight such commissions in the United States.

The EMRIA program is administered by the U.S. Bureau of Land Management under the Department of the Interior. The purpose of EMRIA is to determine the reclamation potential for lands disturbed by removal of energy minerals and the post-mining effects on surface and groundwater within the basin of disturbance. Chemical and physical data are collected through EMRIA studies in cooperation with the Bureau of Reclamation, Geological Survey, Soil Conservation Service, state agencies, and from coordination with private companies.

HOW ERIS IS ORGANIZED

- PROJECTS REPORTS (formerly called Quarterly Reports) contain descriptions of energy research in the Old West Region.
- Each REPORT is indexed according to Location, Name, Organization, and Subject.
- CUMULATIVE INDEXES are provided once a year to incorporate previous indexes of the year's PROJECTS REPORTS under one cover.
- Project descriptions are not included with the Cumulative Index.
- CUMULATIVE INDEXES and the year's PROJECTS REPORTS comprise a set of information.

REPORTING FORM
ENERGY RESEARCH INFORMATION SYSTEM
Old West Regional Commission

INSTRUCTIONS: Please complete the relevant categories of the Reporting Form for each energy-related project currently being conducted or recently completed by your organization in the States of the Old West Region. If an umbrella project covers several separate studies, fill out a form for each one, as well as for the umbrella project. If you want any of the information you provide to be omitted from ERIS publications, make a note of this in Category 17, "Special Instructions for Proprietary Information."

In order to assist us in assigning keywords for computer access to your research information, we ask that you circle the most descriptive words and phrases of the Title and Abstract. If necessary, add additional terms of your own choosing.

If you are amending previously submitted information, please note this on the Reporting Form.

PLEASE RETURN COMPLETED REPORTING FORM(S) TO: ERIS, OLD WEST REGIONAL COMMISSION, 228 HEDDEN-EMPIRE BLDG., BILLINGS, MT 59101. PHONE: (406) 657-6665 (Commercial) or 585-6665 (FTS).

TIME FRAME
JAN. 1973 TO JUNE 1975
LOCATION
MT
ABSTRACT
THE ENVIRONMENTAL QUALITY COUNCIL'S MONTANA ENERGY POLICY STUDY IS DESIGNED TO PROVIDE DATA AND POLICY RECOMMENDATIONS TO ASSIST MONTANA LEGISLATORS IN DEVELOPING A STATE ENERGY POLICY. THE FIRST THREE PARTS OF THE STUDY TRACE THE CAUSES OF THE ENERGY CRISIS, EXAMINE CURRENT ENERGY SUPPLY AND DEMAND DATA, ANALYZE THE MAJOR STUDIES INVESTIGATING THE PROBLEM, AND SUGGEST SOME DECISIONS MONTANA OUGHT TO CONSIDER.
THE PRINCIPAL FINDING OF THE STUDY IS THAT MONTANA MUST TAKE IMMEDIATE ACTION IF IT IS TO PROTECT MUCH OF ITS LONG-RANGE AGRICULTURAL BASE, ITS ECONOMIC STABILITY, ITS ENVIRONMENTAL QUALITY, AND ITS UNIQUE WAY OF LIFE. IN THE ABSENCE OF MONTANA ACTING TO DETERMINE ITS OWN DESTINY, THE STATE'S FUTURE WILL BE DICTATED BY THE FEDERAL GOVERNMENT AND THE ENERGY CONGLOMERATES WHOSE ACTIONS, IF HISTORY IS ANY GUIDE, WILL BE BASED UPON EXPEDIENCE AND PROFIT MAXIMIZATION AND MAY NOT COINCIDE WITH WHAT IS BEST FOR MONTANA. ABSTRACT
THIS STUDY REVIEWED THE IMPACTS ON NORTHEASTERN MONTANA OF THE COAL-CONVERSION DEVELOPMENTS OF THE SASKATCHEWAN POWER CORPORATION. ON SEPTEMBER 11, 1974, THE PROVINCE OF SASKATCHEWAN ANNOUNCED PLANS FOR THE FIRST STAGE OF A 1,200-MILLION WATT COAL-FIRED ELECTRIC POWER COMPLEX TO BE ERECTED IN SOUTHERN SASKATCHEWAN NEAR THE INTERNATIONAL BORDER WITH MONTANA. A STRIP MINE, DAM AND RESERVOIR FOR COOLING WATER AND THE FIRST OF FOUR 300-MILLION WATT GENERATING STATIONS WERE TO BE BUILT IN THE HEADWATERS DRAINAGE OF THE EAST FORK OF THE POPLAR RIVER. THIS STUDY CONCERNS ITSELF WITH THE PEOPLE, LAND AND ECONOMY OF THE POPLAR RIVER BASIN, WATER RIGHTS ISSUES, INDUSTRIAL AND AGRICULTURAL DEVELOPMENT, THE BOUNDARY WATERS TREATY, AND MONTANA ENVIRONMENTAL DEGRADATION FROM THE PROPOSED DEVELOPMENT. RESEARCH EFFORT USES POWDER RIVER BASIN DATA FOR METHODOLOGY DEVELOPMENT.)

ABSTRACT
THE BATTELLE-PACIFIC NORTHWEST LABORATORIES IS CONDUCTING A MULTI-YEAR PROGRAM DIRECTED TOWARDS ASSESSING THE LONG-TERM ENVIRONMENTAL, SOCIOECONOMIC, AND HEALTH EFFECTS OF PROBABLE AND POSSIBLE ENERGY-RELATED DEVELOPMENTS IN THE NORTHWEST STATES (AK, ID, OR, MT, WA, WY). THE WORK IS INTENDED TO DEVELOP A BETTER UNDERSTANDING OF THE REGIONAL IMPLICATIONS OF NATIONAL POLICIES, TECHNOLOGY DEVELOPMENT ACTIVITIES, AND ACTIONS AS WELL AS THOSE OF STATE AND REGIONALLY DEVELOPED PROGRAMS AND POLICIES. AFTER CONSIDERATION OF A VARIETY OF APPROACHES TO INTEGRATED ASSESSMENT AT A REGIONAL LEVEL, BATTELLE PACIFIC NORTHWEST LABORATORIES HAS CONCLUDED THAT DYNAMIC SIMULATION TECHNIQUES PROVIDE THE BEST AVAILABLE APPROACH TO EVALUATING THE ISSUES PERTINENT TO THE NORTHWEST. AS A RESULT, THE PACIFIC NORTHWEST REGIONAL ASSESSMENT PROGRAM HAS BEEN STRUCTURED IN A FRAMEWORK INVOLVING TEN SECTORS. EACH OF THESE SECTORS INVOLVE THEIR OWN SUBMODELS THAT RECEIVE INFORMATION EITHER FROM OUTSIDE THE MODEL AS EXOGENOUS INPUTS OR FROM OTHER SECTOR SUBMODELS. THE TEN SECTORS ARE: ENERGY, ECONOMIC, DEMOGRAPHIC, AIR RESOURCES, WATER RESOURCES, LAND RESOURCES, SOCIAL IMPACTS, PSYCHOLOGICAL IMPACTS, HEALTH, AND BIOPRODUCTIVITY.
IN ADDITION TO THE SEVERAL SECTORS OF THE DYNAMIC SIMULATION MODEL, A FINAL TASK HAS AS ITS MAIN OBJECTIVE THE IDENTIFICATION AND ANALYSIS OF MAJOR INSTITUTIONAL CONSTRAINTS TO ENERGY DEVELOPMENT IN THE PACIFIC NORTHWEST REGION. INITIAL APPLICATION OF THE ANALYTICAL FRAMEWORK WILL BE TO THE INTERLABORATORY COOPERATIVE PROGRAM ON THE NATIONAL COAL UTILIZATION ASSESSMENT BEING CONDUCTED BY ERDA'S NATIONAL LABORATORIES. (MEO)

STUDY AFFILIATION
THIS PROJECT IS PART OF 'NATIONAL COAL UTILIZATION PROGRAM,' U.S. ERDA.

REPORTS AND PUBLICATIONS
SPECIFIC RESULTS OF THE ASSESSMENT ACTIVITIES ARE COVERED IN A SERIES OF ANNUAL AND TOPICAL REPORTS.

LOCATION
MT - VALLEY CO.; GLASGOW AFB
ABSTRACT
MERDI WILL STUDY THE FEASIBILITY OF AN ENERGY DEVELOMENT CENTER AND ANALYZE THE ENVIRONMENTAL IMPACT OF SITING ENERGY FACILITIES AT GLASGOW AIR FORCE BASE (GAFB), MONTANA. THE PROJECT WILL FOCUS ON CONVENTIONAL ENERGY-PRODUCING FACILITIES AS WELL AS THE USE OF 'SOFT' TECHNOLOGIES--SOLAR AND WIND. A COMPLETE, DYNAMIC ENERGY-ECONOMIC COMPUTER MODEL OF MONTANA WILL BE DEVELOPED TO GIVE A PREDICTION OF THE NEEDS OF MONTANA'S PRIMARY, SECONDARY, GOVERNMENTAL, AND HOUSEHOLD SECTORS. ALSO, ENERGY EFFECTS AND CAPITAL CONSTRAINTS WILL BE INCLUDED WHICH DESCRIBE HOW CHANGING ENERGY POLICIES AND PRICES AFFECT THESE SECTORS. THE BASELINE CHARACTERISTICS AND ENVIRONMENTAL CONDITIONS OF THE AREA WILL BE ESTABLISHED BASED ON THE FOLLOWING CRITERIA: WILDLIFE, VEGETATION, WATER QUALITY AND AQUATIC ECOLOGY, AND METEOROLOGY. TO ACCOMPLISH THIS TASK, FIELD RESEARCH WILL BE CONDUCTED FOR ONE YEAR, AND A METEOROLOGICAL TOWER WILL BE INSTALLED AND OPERATED. (MEO)

THE CENTER FOR GOVERNMENT RESEARCH, UNDER THE AUSPICES OF THE INSTITUTE FOR POLICY RESEARCH AT THE UNIVERSITY

BEST DOCUMENT AVAILABLE

OF WYOMING. CONDUCTED ITS THIRD WYOMING ELECTION YEAR SURVEY IN 1976. NEARLY 1,000 PERSONS FROM ACROSS THE STATE WERE PERSONALLY INTERVIEWED DURING THE THREE WEEKS PRIOR TO THE NOVEMBER ELECTION AND, FOLLOWING THE ELECTION, WERE CALLED BACK FOR INFORMATION ON THEIR VOTING BEHAVIOR. IN THE PRE-ELECTION INTERVIEW A WIDE VARIETY OF QUESTIONS WERE ASKED ABOUT THE RESPONDENTS' ATTITUDES ON PUBLIC POLICY ISSUES, PERCEPTIONS OF POLITICAL CANDIDATES (STATE AND NATIONAL), THEIR POLITICAL ATTITUDES, FEELINGS ABOUT TAXES (EMPHASIS ON ENERGY-RELATED TAXES) AND PUBLIC SERVICES AS WELL AS DEMOGRAPHIC CHARACTERISTICS. THE POST-ELECTION TELEPHONE INTERVIEW ASKED WHETHER THE RESPONDENTS VOTED, FOR WHOM THEY VOTED IN THE PRESIDENTIAL, SENATORIAL AND CONGRESSIONAL ELECTIONS AND HOW THEY VOTED ON THE TAX ISSUES WHICH WERE ON THE BALLOT. THIS REPORT SUMMARIZES FINDINGS ON ENERGY-RELATED ISSUES, TAX ATTITUDES AND PUBLIC SERVICES, PUBLIC EMPLOYEE BARGAINING AND SUPPORT FOR POLITICAL CANDIDATES AND OFFICIALS IN WYOMING.

ABSTRACT

ENVIRONMENTAL RESOURCES HAVE SPECIAL FEATURES MAKING THEM DISTINCT FROM OTHER NATURAL RESOURCES AS WELL AS OTHER ECONOMIC GOODS AND SERVICES. IF THESE FEATURES ARE IGNORED, ENVIRONMENTAL RESOURCE DECISIONS CAN BE NON-OPTIMAL IN NATURE AND HIGHLY INEFFICIENT. THESE FEATURES INCLUDE: COMMON POOL PROBLEMS; STOCK AND RESOURCE UNCERTAINTY; FUTURE DEMAND UNCERTAINTY; UNCERTAINTY ON TECHNOLOGICAL SUBSTITUTES; OWNERSHIP PATTERNS; DISCREPANCIES BETWEEN PRIVATE AND SOCIAL RATES OF DISCOUNT; INCENTIVES FOR EXPLOITATION AND GENERAL DISCREPANCIES BETWEEN MARGINAL SOCIAL AND PRIVATE COSTS. MORE THAN 200 EXISTING ECONOMIC MODELS DESCRIBING OPTIMAL PRICE AND USE RATES FOR NATURAL RESOURCES HAVE BEEN GENERATED. WITHOUT A SYNTHESIS THIS LITERATURE, ALTHOUGH ADDRESSING AN EXTREMELY RELEVANT POLICY ISSUE, HAS BEEN VIRTUALLY UNTAPPED BY POLICYMAKERS BECAUSE OF ITS DIFFUSENESS AND COMPLEXITY. IT IS THE PURPOSE OF THIS RESEARCH TO EXTEND, GENERALIZE, SIMPLIFY, AND SYNTHESIZE THIS EXISTING SET OF ENVIRONMENTAL RESOURCE MODELS. THE RESULTS OF THIS AUGMENTIVE AND TAXONOMIC PROCESSES WILL BE UTILIZED TO DEVELOP A POLICY HANDBOOK ACCESSIBLE AND UNDERSTANDABLE TO DECISION-MAKERS WHICH WILL PROVIDE GUIDELINES AND OPTIMAL RULES FOR EFFICIENTLY MANAGING ENVIRONMENTAL RESOURCES THROUGH DIRECT AND INDIRECT CONTROLS. WORK ELEMENTS INCLUDE A SERIES OF COMMISSIONED PAPERS, A MAJOR CONFERENCE, THE DEVELOPMENT OF POLICY MODELS, AND REGIONAL SEMINARS.

ABSTRACT
THE PROJECT HAS TWO OBJECTIVES: (1) DEVELOP COMPUTER-ASSISTED TECHNIQUES TO ASSESS AND PREPLAN MOVEMENT AND PLACEMENT OF OVERBURDEN SO AS TO ACHIEVE OPTIMAL RECLAMATION; (2) ASSIST IE/CS DEPARTMENT IN DEVELOPMENT OF A COMPUTER-BASED RECLAMATION PLANNING SYSTEM. THE RPS WILL INCLUDE PROGRAMS FOR ASSESSMENT OF OVERBURDEN AND COAL RESOURCES, FOR SIMULATION OF MINING AND REGRADING, AND FOR PREDICTION OF RESULTANT MASS STABILITY, SUB-SURFACE HYDROLOGY, AND SOIL CHARACTERISTICS RELATED TO REVEGETATION SUCCESS FOR PRE-PLANNED LAND USES. ASSOCIATED RESEARCH IS ASSESSING EROSION OF SPOILANTS, ROAD NETWORK IMPACTS, AND LAND SUBSIDENCE AFTER MINING AND REGRADING. THE RPS WILL INTEGRATE THIS EFFORT AND RELATED WORK (IN THE BIOLOGICAL/AGRONOMIC REALMS) INTO A COMPREHENSIVE PLANNING AND DESIGN PACKAGE. (MEO)

ABSTRACT
INVESTIGATE THE MEANS OF RE-ESTABLISHING NONPOLLUTED, HYDROLOGIC SYSTEMS IN AREAS INFLUENCED BY SURFACE ACTIVITIES WHICH WERE FOUND TO CONTAIN CONCENTRATIONS OF SALTS AND HEAVY METALS. OVERBURDEN CHEMISTRY DISTRIBUTION PATTERNS WERE INTENSIVELY DETERMINED ON A 60-METER GRID BASIS IN 1.5-METER DEPTH INCREMENTS WITH SAMPLES COLLECTED FROM THE BLAST HOLE DRILLING. ON-SITE PHYSICAL AND CHEMICAL ANALYSES WERE PERFORMED IN A MOBILE SOIL LABORATORY. THE 26,000 ANALYSES THUS PERFORMED DELINEATED NUMEROUS ZONES OF CHEMISTRY CONSIDERED INIMICAL FOR SUCCESSFUL RECLAMATION. OBSERVATION WELLS WERE INSTALLED TO MONITOR THE OVERBURDEN, ROSEBUD COAL, AND MCKAY COAL GROUND-WATER SYSTEMS. DATA FROM THE INSTALLATIONS WERE USED TO ESTIMATE POST-RECLAMATION WATER LEVELS AND THE RECHARGE AND WATER MOVEMENT CHARACTERISTICS IN THE VICINITY. DEMONSTRATION OF SELECTIVE OVERBURDEN HANDLING TECHNIQUES WAS COMPLETED USING ON-SITE MINE EQUIPMENT. THE DEMONSTRATION INCLUDED: 1. CASTING SPOIL IN NORMAL SIDECASTING PROCEDURES; 2. SEGREGATION AND BURIAL OF INIMICAL MATERIALS WITHOUT CLAY CAP; AND 3. SEGREGATION AND BURIAL OF INIMICAL MATERIALS COVERED BY A RELATIVELY IMPERMEABLE 1.0-METER THICK CLAY CAP.

ABSTRACT
IN ORDER TO FURNISH MAXIMUM INFORMATION FOR THE EVALUATION OF THE PROBABLE IMPACT OF STRIP MINING ON THE STUDY AREA, IT IS IMPORTANT TO HAVE THE CHEMICAL COMPOSITION OF THE STRATA TO BE DISTURBED, AND THE AVAILABILITY OF BOTH NUTRIENTS AND HARMFUL ELEMENTS IN THIS MATERIAL. THIS RESEARCH GROUP AT MONTANA STATE UNIVERSITY HAS BEEN STUDYING A SYSTEM OF SEPARATING SOIL SOLUTIONS FROM THE SOIL WITHOUT APPRECIABLY CHANGING THE CONCENTRATIONS OF THE VARIOUS ELEMENTS IN THE SOIL SOLUTIONS. THIS TECHNIQUE CONSISTS OF CENTRIFUGING THE NATURAL SOIL OR POTENTIAL SOIL WITH CARBON TETRACHLORIDE OR OTHER INERT EMISSABLE DENSE LIQUIDS. THE WATER, BEING LIGHTER THAN THE SUPPORT LIQUID, IS DRIVEN TO THE TOP BY CENTRIFUGAL FORCE, LEAVING THE CARBON TETRACHLORIDE BETWEEN THE WATER AND THE SOIL. THE WATER IS PIPETTED INTO A SMALL GRAPHITE CUP, EVAPORATED, AND THE CUP INSERTED INTO A CONSTANT TEMPERATURE

BEST DOCUMENT AVAILABLE

GRAPHITE TUBE FURNACE. THE ABSORPTION OF THE VAPOR PRODUCED IS MEASURED WITH A SPECTROPHOTOMETER. WORK HAS STARTED ON THE APPLICATION OF THIS TECHNIQUE TO THE PROBLEMS THAT WILL BE INVOLVED IN EVALUATING THE IMPACT OF STRIP MINING ON THE AREA. THIS WORK WILL BE CARRIED OUT IN COOPERATION WITH PEOPLE WORKING ON OTHER METHODS OF EXTRACTING SIGNIFICANT ELEMENTS FROM SOIL OR POTENTIAL SOIL MATERIALS. THE RESULTS OF THIS STUDY SHOULD NOT ONLY PROVIDE THE BASIS FOR EVALUATING THE POTENTIAL IMPACT OF STRIP MINING ON THE STUDY AREA, BUT SHOULD ALSO PROVIDE THE INVESTIGATORS OF FUTURE AREAS WITH BETTER AND MORE PRECISE EVALUATION TECHNIQUES. ABSTRACT

THE CONGRESS HAS BEEN DESIGNED TO FILL THE VOID IN COMMUNICATION OF SURFACE COAL MINING RECLAMATION PROBLEMS. REPRESENTATIVES FROM INTERNATIONAL SURFACE COAL MINING EFFORTS WILL DISCUSS 3 MAJOR TOPICS IN CONCURRENT SESSIONS: PLANNING: 1. LOGISTICS OF PLANNING, A. PROBLEMS FACING INDUSTRY, B. LAW FORMULATION AND ENFORCEMENT PROBLEMS OF GOVERNMENT, C. PLANNING CRITERIA ACCEPTABLE TO ENVIRONMENTALISTS; 2. CRITERIA FOR EXPLORATION, GO-AHEAD/ABANDONMENT BY INDUSTRY; 3. DEVELOPMENT OF MINING BY INDUSTRY; 4. IMPACT STATEMENTS AS SEEN BY INDUSTRY, UNIVERSITIES AND CONSULTING COMPANIES; 5. LEASING OF FEDERAL LANDS BY GOVERNMENT.
ECONOMICS: 1. A SYSTEMS APPROACH TO MINING ECONOMICS WITH SPECIAL REFERENCE TO THE ENVIRONMENT; 2. COST OF DEVELOPING A MINE; 3. POSTMINING COSTS INCLUDING RECLAMATION; 4. LEGISLATIVE PROCESSES AND ECONOMICS; 5. ECONOMICS OF RE-USE OF WATER, FLY ASH, CRUDE GYPSUM AND OTHER BY-PRODUCTS.
ECOLOGY APPROACHES TO RECLAMATION: 1. AGRICULTURAL; 2. RANGE; 3. RECREATIONAL (AESTHETIC); 4. SUCCESSIONAL; 5. URBAN; 6. WILDLIFE; 7. WATERSHED.

ABSTRACT
THE SASKATCHEWAN POWER CORPORATION IS PRESENTLY DEVELOPING A COAL-FIRED GENERATION COMPLEX ON THE EAST POPLAR RIVER. CONSTRUCTION OF A COOLING RESERVOIR WAS INITIATED IN 1975 AND IMPOUNDMENT OF RUN-OFF WATER BEGAN IN THE SPRING OF 1976. THIS PROJECT WILL GREATLY REDUCE FLOWS AND ALTER FLOW REGIMENS IN THE EAST POPLAR RIVER. FLOWS IN THE MIDDLE AND WEST POPLAR RIVER MAY ALSO BE AFFECTED IN THE FUTURE. SINCE DIVERSIONS TO THE EAST FORK ARE ANTICIPATED FOR SUPPLEMENTAL WATER. COINCIDENT WITH FLOW REDUCTIONS. SIGNIFICANT DEGRADATION OF WATER QUALITY HAS BEEN FORECAST AS A RESULT OF NATURAL AND FORCED EVAPORATION AT THE EAST POPLAR COOLING RESERVOIR. THIS IS PARTICULARLY SIGNIFICANT. SINCE IT IS BELIEVED THAT CONDITIONS NECESSARY TO MAINTAIN KEY SPORT FISHES ARE PRESENTLY MARGINAL.
FISH POPULATION STUDIES WERE INITIATED AT SEVERAL STATIONS THROUGHOUT THE DRAINAGE IN 1975 TO ACQUIRE BASELINE INFORMATION. SEINING AND ELECTROFISHING WERE CONDUCTED TO DETERMINE INFORMATION ON SPECIES ABUNDANCE AND DISTRIBUTION. OVER 1,000 FISH WERE TAGGED OR MARKED TO DETERMINE POPULATIONS AND MOVEMENT. (MEO)

ABSTRACT
THE MAJOR GOAL OF THIS EFFORT INCLUDES A DETAILED AND RECONNAISSANCE LEVEL HYDROLOGICAL STUDY IN THE POPLAR RIVER AREA OF NORTHEAST MONTANA. THIS STUDY IS NECESSARY SO THAT A THOROUGH UNDERSTANDING MAY BE GAINED OF THE EXTANT SHALLOW GROUND WATER SYSTEM AND THE RELATIONSHIP OF SURFACE WATERS WITH SUCH SYSTEMS. MOREOVER, THE EFFORT WILL SERVE TO ESTABLISH BASELINE QUALITY AND QUANTITY CONDITIONS FOR SUCH SHALLOW GROUND WATERS AND ALSO TO IMPLEMENT A GROUND WATER MONITORING SYSTEM. IN ORDER TO ACHIEVE THE PRINCIPAL GOALS OF THE EFFORT, SPECIFIC OBJECTIVES AND SUB-OBJECTIVES OF THE STUDY INCLUDE THE FOLLOWING: 1. ESTABLISH BASELINE GROUND WATER CONDITIONS IN DEFINED STUDY AREA(S) PRIOR TO MINING OR POWER GENERATION; 2. DESIGN AND IMPLEMENT A GROUND WATER MONITORING SYSTEM CAPABLE OF DETECTING CHANGES IN THE GROUND WATER SYSTEM ATTRIBUTABLE TO MINING AND POWER GENERATION; 3. ESTABLISH AND MAINTAIN CLOSE COOPERATION WITH CANADIANS PERFORMING GROUND WATER STUDIES IN THE POPLAR RIVER BASIN. (MEO)

ABSTRACT
THE BASIC OBJECTIVE OF THE MODELING EFFORT IS THE DEVELOPMENT AND APPLICATION OF A WATER QUALITY SYSTEMS MODEL FOR FLOWING WATERS TO PREDICT THE IMPACTS OF COAL-FIRED POWER GENERATING FACILITIES, SURFACE MINING OF COAL, RESERVOIR CONSTRUCTION AND NON-ENERGY RELATED ACTIVITIES OR NATURAL PROCESSES ON THE QUALITY OF THE POPLAR RIVER AND PRINCIPAL TRIBUTARIES DOWNSTREAM OF THE U.S.-CANADIAN INTERNATIONAL BOUNDARY. DATA INPUTS TO THE MODEL WILL CONSIDER, BUT WILL NOT BE NECESSARILY LIMITED TO THE FOLLOWING CRITERIA: 1. POTENTIAL IMPACTS OF POLLUTANTS ON AQUATIC ECOSYSTEMS; 2. SYNERGISTIC EFFECTS OF POLLUTANTS; 3. CONCENTRATION OF POLLUTANT; 4. INTERRELATIONSHIP OF PARAMETERS BEING MODELED; 5. ADAPTABILITY OF POLLUTANT TO MODELING TECHNIQUES; 6. IMPORTANCE OF PARAMETER AS A POLLUTION INDICATOR; THE MODEL IS TO HAVE THE CAPABILITY TO PREDICT SOURCE-SPECIFIC IMPACTS AS WELL AS COLLECTIVE IMPACTS UNDER A WIDE RANGE OF FLOW CONDITIONS. EMPHASIS WILL BE PLACED ON THE MODELING OF CONSERVATIVE CONSTITUENTS SUCH AS TDS, BORON, SODIUM, SULFATE, ETC. THE MODEL IS TO CONSIDER GROUND WATER INFLOW AND RECHARGE, DEPLETIONS, IRRIGATION RETURN FLOWS, MINE DEWATERING, GROSS NON-POINT PROBLEMS, LAND USE, SOIL TYPE, SOIL MOISTURE HOLDING CAPACITY, STREAM TEMPERATURE DYNAMICS AND GROSS ANALYSIS OF THE RESERVOIR (CORONACH). MODEL OUTPUTS WOULD BE MONTHLY FOR SELECTED POINTS IN THE SYSTEM INCLUDING THE INTERNATIONAL BOUNDARY, THE MOUTHS OF MAJOR TRIBUTARIES, THE POPLAR RIVER ABOVE AND BELOW TRIBUTARIES AND AT THE MOUTH OF THE POPLAR RIVER. ABSTRACT
VIGIL NETWORK ESTABLISHMENT CONSISTS OF MAPPING BOTH PLANIMETRICALLY AND IN CROSS SECTION, REPRESENTATIVE REACHES OF RIVERS; ESTABLISHING PEAK FLOOD GAGES WHERE NOT PRESENT, AND ASSESSING THE PRESENT BIOTIC STATE OF THOSE RIVERS WITH RESPECT TO BENTHIC FAUNA AND STREAMBANK FLORA. IT IS ANTICIPATED THAT ABOUT 50 CAREFULLY CHOSEN VIGIL NETWORK STATIONS SHOULD BE ESTABLISHED FOR THE EASTERN MONTANA COAL REGION TO ALLOW FOR REGIONAL VARIABILITY IN PRECIPITATION FREQUENCY VARIABLES. A SECOND PHASE OF INVESTIGATION CONSISTING OF PHOTOGEOLOGIC MAPPING SUPPLEMENTED BY DETAILED FIELD INVESTIGATION OF SELECTED WATERSHEDS WILL BE CONDUCTED TO MORE FULLY EVALUATE THE AREA-WIDE, DYNAMIC EQUILIBRIUM-DISEQUILIBRIUM RELATIONSHIPS AS THEY NOW EXIST. SUCH COLLECTIONS OF BASE HYDROGRAPHIC DATA ARE EXTREMELY USEFUL TO MONITOR AND ASSESS EFFECTS OF LAND USE

PRIMARY FUNDING AMOUNT
9,000,000
TIME FRAME
DEC. 1975 TO SEPT. 1980
LOCATION
MT NE ND SD WY; POWDER RIVER BASIN
ABSTRACT
MAJOR DEVELOPMENT OF COAL WITHIN THE AREA WILL PLACE A HEAVY DEMAND ON THE AREA'S LIMITED WATER RESOURCES. SURFACE WATER IS POORLY DISTRIBUTED IN TIME AND SPACE. IT IS FULLY APPROPRIATED IN PART OF THE AREA, AND IN THE REST ITS USE WILL REQUIRE STORAGE RESERVOIRS AND DISTRIBUTION SYSTEMS. PRELIMINARY STUDIES INDICATE THAT THE MADISON LIMESTONE (MADISON GROUP) AND ASSOCIATED ROCKS MIGHT PROVIDE A SIGNIFICANT PERCENTAGE OF THE TOTAL WATER REQUIREMENTS FOR COAL DEVELOPMENT. HOWEVER, THE EFFECTS OF LARGE SUSTAINED WITHDRAWALS OF WATER FROM THESE ROCKS ON THE HYDROLOGIC SYSTEM ARE NOT KNOWN.
THE OBJECTIVES OF THE FIVE-YEAR HYDROLOGIC STUDY OF THE MADISON LIMESTONE AND ASSOCIATED ROCKS ARE TO EVALUATE THE QUANTITY OF WATER THAT MAY BE AVAILABLE FROM THE MADISON; DEFINE THE CHEMICAL AND PHYSICAL PROPERTIES OF THE WATER; DETERMINE THE EFFECTS OF EXISTING DEVELOPMENTS ON POTENTIOMETRIC HEAD, STORAGE, RECHARGE AND DISCHARGE, SPRING FLOW AND STREAM FLOW, AND PATTERN OF GROUND WATER FLOW; PREDICT THE POSSIBLE HYDROLOGIC EFFECTS OF PROPOSED WITHDRAWALS OF WATER FOR LARGE-SCALE DEVELOPMENTS AT SELECTED RATES AND LOCATIONS; DETERMINE THE OPTIMUM LOCATIONS FOR WELLS AND THE TYPE OF CONSTRUCTION AND DEVELOPMENT OF DEEP WELLS TO OBTAIN MAXIMUM YIELDS; AND DESIGN A NETWORK OF OBSERVATION WELLS AND STREAMFLOW GAGES TO MONITOR EFFECTS OF ADDITIONAL DEVELOPMENTS ON THE HYDROLOGIC SYSTEM. (MEO)

ABSTRACT
OBJECTIVES: 1. TO GATHER BASELINE DATA ON SELECTED EXAMPLES OF NATIVE GRASSLAND, SHRUBLAND, AND FOREST VEGETATION TYPES; 2. TO DEVELOP PROCEDURES FOR LONG-TERM MONITORING OF CHANGES IN THESE TYPES; 3. SPECIFICALLY TO STUDY NATIVE VEGETATION TYPES FOR ANY CHANGES INDUCED BY AIR POLLUTION OR OTHER DISTURBANCES CAUSED IN CONNECTION WITH THE DEVELOPMENT OF MINING OR ENERGY PRODUCTION ACTIVITIES ON THE RESERVATIONS OR ON ADJACENT LAND.
RESPONSIBILITIES: MONTANA STATE UNIVERSITY: CONSULT WITH BIA PERSONNEL ABOUT SELECTING STUDY AREAS, ESTABLISHING GROUND TARGETS, AND DESIGNING VEGETATION MONITORING PROCEDURES. PLAN AND CONDUCT AERIAL PHOTOGRAPHIC MISSIONS, ARRANGE FOR PROCESSING AND DUPLICATION OF IMAGERY; STORE ORIGINAL FILM. ASSIST IN GROUND TRUTH AND PHOTO-INTERPRETATION STUDIES; DEVELOP PROCEDURES FOR VEGETATIONAL MAPPING AND COMPUTER PROCESSING OF DATA. PREPARE REPORTS AS REQUIRED BY CONTRACTING AGENCY. ASSIST IN PLACEMENT AND OPERATION OF CLIMATOLOGICAL MONITORING EQUIPMENT.
BUREAU OF INDIAN AFFAIRS: SELECT STUDY AREAS, LAY OUT GROUND TARGETS, COLLECT GENERAL VEGETATION AND SITE DATA. ESTABLISH GROUND PHOTO PLOTS. PROVIDE MAPS AND DATA FOR AERIAL PHOTO PLANNING AND GROUND STUDIES. THE UNIVERSITY AND THE BUREAU OF INDIAN AFFAIRS BOTH WILL HAVE THE RIGHT TO PUBLISH SCIENTIFIC AND POPULAR PAPERS ABOUT THIS WORK, WITH THE UNDERSTANDING THAT EACH AGENCY WILL CONSULT AND CLEAR WITH THE OTHER. ABSTRACT
THE PROJECT WAS AN ONGOING PRELIMINARY EFFORT TO: 1. DEVELOP A SATISFACTORY, REALISTIC CLASSIFICATION OF GRASSLAND BIOTIC COMMUNITIES ON THE NORTHERN INTERIOR PLAINS OF NORTH AMERICA (INCLUDING THE PRAIRIE REGIONS OF ALBERTA, SASKATCHEWAN, MANITOBA, MONTANA, AND NORTH DAKOTA, AND PORTIONS OF WYOMING, SOUTH DAKOTA, AND MINNESOTA), AND 2. TO ASSESS THE USE MADE OF EACH PRAIRIE GRASSLAND COMMUNITY TYPE BY BREEDING-BIRD POPULATIONS. THE STUDY WILL BE MODIFIED DURING THIS FY TO SELECT AND MODIFY A CLASSIFICATION SYSTEM JOINTLY WITH THE HABITAT ASSESSMENT GROUP, AND TO DESIGN, PLAN, AND INITIATE COOPERATIVE STUDIES (WITH OTHER FWS RESEARCH ELEMENTS) TO QUANTIFY THE DISTRIBUTION AND ABUNDANCE AND RATES OF CHANGE OF NATURAL AND ALTERED ECOSYSTEMS IN THE NGP TO CHARACTERIZE THESE ECOSYSTEMS AS TO THE PRODUCTIVITY AND IMPORTANCE TO THE MAINTENANCE OF AVIAN POPULATIONS, AND DEVELOP MODELS TO PREDICT THE IMPACT OF HABITAT CHANGES ON THE DIVER-

ABSTRACT
THE STUDY WILL CHARACTERIZE SELECTED WILDLIFE HABITATS AND DETERMINE THE LONG-TERM EFFECTS OF COAL DEVELOPMENT ON THESE HABITAT AND RELATED WILDLIFE POPULATION RESPONSES. BASIC POPULATION INDICES OF SELECTED WILDLIFE SPECIES WILL BE ESTABLISHED PRIOR TO MINING ACTIVITIES AND FOLLOWING CHANGES DURING AND AFTER THE DEVELOPMENT PERIOD. THE STUDY IS ALSO DESIGNED TO DETERMINE THE EFFECTIVENESS OF LAND-RECLAMATION PROCEDURES. MEASURE AND EVALUATE THE SIGNIFICANT HABITAT TYPES ON AND NEAR THE STUDY AREAS AND DETERMINE HOW MOVEMENT PATTERNS OF SELECTED WILDLIFE SPECIES ARE AFFECTED BY MINING AND RELATED ACTIVITIES.
PRODUCT: A QUANTITATIVE REPORT SHOWING HOW COAL EXTRACTION AND RELATED DEVELOPMENT AFFECTS WILDLIFE. RECOMMENDATIONS WILL BE GIVEN ON HOW MINING PLANS CAN BE ALTERED TO HAVE THE LEAST DETRIMENTAL EFFECT ON WILDLIFE.

ABSTRACT
BECAUSE OF THE EXISTING WHEAT INDUSTRY IN NORTHEASTERN

BEST DOCUMENT AVAILABLE

MONTANA. AS WELL AS THE CONCERN FOR THE PROTECTION OF OTHER VEGETATION FROM THE HARMFUL EFFECTS OF AIR POLLUTANTS. A DETAILED STUDY WILL BE PERFORMED TO DOCUMENT THE THRESHOLD AIR QUALITY LEVELS WHICH ARE INJURIOUS TO CROPS AND VEGETATION. WHEAT AND OTHER CEREAL CROPS IN THE GERMINATION STAGE WILL BE STUDIED. VEGETATION SENSITIVITY WILL BE ANALYZED. AN INITIAL STEP WILL BE TO EVALUATE THE EXISTING LAND USE. A SECOND STEP WILL BE TO PERFORM A LITERATURE SEARCH ON THE EFFECTS OF AIR POLLUTANTS ON THE PERTINENT SPECIES. THE FINAL PHASE OF THIS PROGRAM WILL BE TO CONDUCT GREENHOUSE STUDIES IN ORDER TO COLLECT THOSE MISSING DATA. (MEO)

ABSTRACT
THE SASKATCHEWAN POWER CORPORATION IS BUILDING A 300-MEGAWATT ELECTRIC POWER GENERATING STATION NEAR CORONACH, SASKATCHEWAN, ABOUT 30 MILES NORTHWEST OF SCOBEY ON THE EAST FORK OF THE POPLAR RIVER. CONSTRUCTION AND OPERATION OF THIS PLANT, THE FIRST OF FOUR SUCH PLANTS THAT CANADIAN FIRMS MAY BUILD ON THE POPLAR, IS CAUSING CONCERN ABOUT POSSIBLE DEGRADATION OF THE ENVIRONMENT IN THE U.S. THE UNITS WILL USE LIGNITE, WHICH IS ABUNDANT IN THE AREA, FOR POWER GENERATION AND WILL BE COOLED BY WATER FROM A 32,000 ACRE-FEET CAPACITY RESERVOIR ON THE EAST POPLAR RIVER.
THE ENVIRONMENTAL PROTECTION AGENCY HAS INITIATED A STUDY OF THE POPLAR RIVER BASIN WHICH WILL INCLUDE THE FOLLOWING COMPONENTS: 1. SOILS ANALYSIS, UPPER AIR METEOROLOGY, COAL ANALYSIS, BASELINE AMBIENT AIR QUALITY, VEGETATION, AND VISIBILITY COMPONENTS TO BE CONDUCTED BY THE AIR QUALITY BUREAU, MONTANA DEPT. OF HEALTH & ENVIRONMENTAL SCIENCES; 2. FISH AND FURBEARER STUDIES TO BE CONDUCTED BY THE MONTANA DEPT. OF FISH AND GAME; 3. WATER QUALITY MODELING EFFORT TO BE CONDUCTED BY THE WATER QUALITY BUREAU, MONTANA DEPT. OF HEALTH AND ENVIRONMENTAL SCIENCES; 4. WATER USE COMPONENT TO BE CONDUCTED BY THE WATER RESOURCES DIVISION, MONTANA DEPT. OF NATURAL RESOURCES AND CONSERVATION; 5. GROUND WATER AND SURFACE WATER MONITORING TO BE CONDUCTED BY THE U.S. GEOLOGICAL SURVEY; 6. VEGETATION EFFECTS RESEARCH TO BE CONDUCTED BY EPA'S CORVALLIS ENVIRONMENTAL RESEARCH LABORATORY; 7. A WATER USE COMPONENT WHICH WILL DESCRIBE THE FUTURE AND EXISTING WATER USE ON TSIBAL LAND WILL BE UNDERTAKEN BY THE FORT PECK TRIBE; 8. REMOTE SENSING LAND USE MAPPING WILL BE UNDERTAKEN BY EPA'S LAS VEGAS LABORATORY.
THE ENVIRONMENTAL PROTECTION AGENCY WILL BE INTEGRATING THE EFFORT SO AS TO PROVIDE SUPPORT FOR THE EIS PROCESS DICTATED UNDER NEPA AS WELL AS TO PROVIDE ALTERNATIVE AIR POLLUTION CONTROL STRATEGIES. (MEO)
REPORTS AND PUBLICATIONS
THE DATA INTEGRATED FROM THIS STUDY WILL PRODUCE TWO REPORTS. ONE REPORT WILL ASSESS ENVIRONMENTAL IMPACT OF AIR AND WATER POLLUTION TO THE U.S. EMANATING FROM THE COAL-FIRED POWER PLANT AT CORONACH. THE SECOND REPORT WILL CONSIDER ALTERNATIVE AIR CONTROL STRATEGIES THAT COULD BE IMPLEMENTED BY THE CANADIANS SO AS TO REDUCE THE AMOUNT OF SULFATES AND PARTICULATES CARRIED ACROSS THE U.S. BORDER FROM CANADA.

ABSTRACT
DEVELOPMENTS PROPOSED BY THE SASKATCHEWAN POWER CORPORATION IN THE POPLAR RIVER AREA OF CANADA MAY HAVE HARMFUL IMPACTS ON THE SOILS OF MONTANA. SUCH IMPACTS MAY BE DERIVED FROM AIR- AND/OR WATER-BORNE CONTAMINANTS EMANATING FROM THE POWER PROJECT.
THE GOAL OF THIS EFFORT IS TO ESTABLISH BASELINE CONDITIONS UPON WHICH THE ADVERSE EFFECTS ON EXTANT SOILS IN MONTANA RESULTING FROM REDUCED QUALITY OF IRRIGATION WATERS AND ALSO HIGH LEVELS OF GASES AND PARTICULATES EMANATING FROM THE POWER PLANT MAY BE EVALUATED. AT LEAST 15 SITES WILL BE SAMPLED WITH THREE SAMPLES BEING TAKEN FROM REPRESENTATIVE SPOTS AT EACH SITE. RECORDS WILL BE KEPT ON PROFILE DESCRIPTIONS, TOPOGRAPHY SURFACE SLOPE, SOIL SERIES, YEARS OF CULTIVATION, YEARS OF IRRIGATION, SOURCE OF WATER, CROP DATA, MANAGEMENT PRACTICES, DISTURBANCES, MICRORELIEF, COMPLETE DESCRIPTION OF SITE LOCATION, AND A LOCATION SKETCH FOR EACH SAMPLE. ABSTRACT
THE OBJECTIVES OF THIS PROJECT ARE TO: 1. IDENTIFY BOTH FISH AND WILDLIFE SPECIES DEPENDENT UPON THE POPLAR RIVER; 2. DETERMINE THE LIFE HISTORY REQUIREMENTS OF THE KEY FISH AND WILDLIFE POPULATIONS NOW FOUND IN AND ALONG THE POPLAR RIVER; 3. DESCRIBE THE HABITAT CHARACTERISTICS CRITICAL TO MEETING THE ECOLOGICAL REQUIREMENTS OF KEY FISH AND WILDLIFE SPECIES; 4. RELATE THIS ECOLOGICAL INFORMATION TO CHANGES EFFECTED BY THE POWER PLANT COMPLEX DEVELOPMENT AND PREDICTABLE ALTERATIONS THAT WOULD OCCUR WITH EXPANDED WATER CONSUMPTION. THE WORK WILL BE DIVIDED INTO A FISHERIES PROJECT, A WATERFOWL PROJECT AND A FURBEARER PROJECT, WITH ALL THREE PROJECT SEGMENTS MAKING A CONTRIBUTION TO THE UNDERSTANDING OF NONGAME WILDLIFE SPECIES ALSO DEPENDENT UPON THIS PARTICULAR SYSTEM. ABSTRACT
THE MONTANA DEPT. OF HEALTH AND ENVIRONMENTAL SCIENCES IS INITIATING A STUDY UNDER HOUSE BILL 250 TO BETTER DEFINE RELATIONSHIPS BETWEEN THE HEALTH OF MONTANA RESIDENTS AND AIR POLLUTION. THE STUDY WILL GENERATE THE TYPE OF INFORMATION NEEDED TO MAKE SOUND DECISIONS CONCERNING THE IMPACTS OF FUTURE COMMUNITY, INDUSTRIAL AND RESOURCE DEVELOPMENT ON HUMAN HEALTH.
THE INFORMATION WILL ALSO HAVE PRACTICAL APPLICATIONS TO LOCAL PLANNING AND DEVELOPMENT ORGANIZATIONS. THE DATA WILL ENABLE THOSE ORGANIZATIONS TO MAKE BETTER ECONOMIC DECISIONS IN TERMS OF IDENTIFYING THE BEST LOCATIONS FOR PROJECTS SUCH AS INDUSTRIAL PARKS OR THE SITING OF LARGE INDUSTRIAL PROJECTS. PROSPECTIVE DEVELOPERS WILL RECEIVE AN ADDITIONAL BENEFIT FROM THE FACT THAT THEY WILL NOT HAVE TO INCUR THE COST OF GATHERING SUCH INFORMATION.
THE STUDY WILL INVESTIGATE THE CORRELATION BETWEEN RESPIRATORY IRRITATION AND LEVELS OF AIR POLLUTION. IT WILL FOCUS ON THREE AREAS OF MONTANA: BUTTE-ANACONDA, MISSOULA AND THE BILLINGS-COAL DEVELOPMENT AREA. IMPORTANT ASPECTS OF THE STUDY INCLUDE: 1. RESEARCHING THE PREVALENCE AND SEVERITY OF CHRONIC OBSTRUCTIVE PULMONARY DISEASE AND LUNG CANCER; 2. THE MONITORING OF TOTAL SUSPENDED PARTICULATES, SULFUR DIOXIDE, SULFATES AND TRACE ELEMENTS; 3. THE COLLECTION OF METEOROLOGICAL DATA TO DETERMINE SOURCES AND CONCENTRATIONS OF VARIOUS POLLUTANTS; 4. UPDATING THE EMISSION INVENTORY TO DETERMINE THE AMOUNTS AND SOURCES OF POLLUTANTS IN DIFFERENT AREAS. THE MONITORING AND METEOROLOGICAL PROGRAMS WILL GENERATE DATA THAT WILL ALLOW THE DEPARTMENT TO DETERMINE THE TYPE, STRENGTH, DURATION AND SOURCES OF AIR POLLUTION LEVELS.. (MEO)

ABSTRACT
THE ANTELOPE VALLEY STATION ENVIRONMENTAL REPORT CONSISTS OF THREE VOLUMES. IN ADDITION TO A DETAILED PROJECT DESCRIPTION, VOLUME I CONTAINS AN ANALYSIS OF THE PHYSICAL AND BIOLOGICAL EFFECTS OF THE CONSTRUCTION AND OPERATION OF ANTELOPE VALLEY STATION AND ITS ASSOCIATED COTEAU MINE. SECTION 3, EXISTING ENVIRONMENT, PRESENTS INFORMATION ON THE FOLLOWING TOPICS: 1. PHYSIOGRAPHY AND TOPOGRAPHY; 2. GEOLOGY AND GEOLOGIC HAZARDS; 3. MINERAL RESOURCES; 4. SOILS, 5. CLIMATE AND METEOROLOGY; 6. AIR QUALITY; 7. NOISE; 8. HYDROLOGY; 9. AQUATIC ECOLOGY; 10. TERRESTRIAL VEGETATION ECOLOGY; AND 11. TERRESTRIAL ANIMAL ECOLOGY. SECTION 4 DISCUSSES THE IMPACTS AND SECTION 5 THE MITIGATIVE MEASURES FOR THESE SAME TOPICS. THE APPENDIX TO VOLUME I PRESENTS MORE DETAILED DATA ON GEOLOGY, SOILS, AIR QUALITY, A MIXING STUDY IN RENNER BAY, LIMNOLOGICAL INVESTIGATIONS AND BOTH TERRESTRIAL ANIMAL AND VEGETATION ECOLOGY.
VOLUME II PRESENTS AN ANALYSIS OF THE EXISTING HUMAN ENVIRONMENT AND THE POTENTIAL EFFECTS OF COAL DEVELOPMENT PROJECTS IN THE AREA. THE IMPACT ANALYSIS WILL CONSIDER THE CUMULATIVE EFFECTS OF THE CONCURRENT GENERATING PLANTS IN MERCER COUNTY INCLUDING ANTELOPE VALLEY STATION, COYOTE GENERATING STATION, FOUR COAL MINES, AND ONE COAL GASIFICATION PLANT.
VOLUME III ANALYZES THE POTENTIAL ENVIRONMENTAL IMPACTS ASSOCIATED WITH THE CONSTRUCTION AND OPERATION OF A HIGH VOLTAGE TRANSMISSION LINE FROM ANTELOPE VALLEY STATION TO HURON, SOUTH DAKOTA AND TWO HIGH VOLTAGE TRANSMISSION LINES FROM ANTELOPE VALLEY STATION TO LELAND OLDS STATION NEAR STANTON, NORTH DAKOTA.
THE TRANSMISSION SYSTEM REPORT ANALYZES PROJECT-ASSOCIATED

LOCATION
SD
ABSTRACT
THE PROJECT OBJECTIVE IS TO EXPLORE THE POSSIBILITY OF USING NAHCOLITE TO EFFECTIVELY REMOVE SO2 FROM BOILER FLUE GAS. A PILOT UNIT WILL BE INSTALLED ON A LIGNITE-FIRED POWER BOILER AND WILL WITHDRAW 'DIRTY' FLUE GAS UPSTREAM OF THE ELECTROSTATIC PRECIPITATOR. THIS PILOT WILL UTILIZE A DRY PULVERIZED NAHCOLITE THAT WILL BE INJECTED INTO THE GAS STREAM UPSTREAM FROM THE BAG FILTER. THE NAHCOLITE, ALONG WITH THE FLY ASH, WILL BE COLLECTED ON THE SURFACE OF THE

BEST DOCUMENT AVAILABLE

BAGS. THIS PILOT WILL BE ABLE TO DETERMINE THE
THE RELATIVE EFFECT ON SO2 REMOVAL BY CONTROLLING
TEMPERATURE, RETENTION TIME AND STOICHIOMETRIC RATIOS.
IF THIS DRY REMOVAL METHOD PROVES TO BE A VIABLE MEANS
OF CONTROLLING SO2 EMISSION, IT HAS SEVERAL ADVANTAGES OVER
WET REMOVAL SYSTEMS NOW BEING USED: IT WOULD REPLACE
BOTH THE ELECTROSTATIC PRECIPITATOR AND SO2 ABSORBER
WITH A STANDARD BAGHOUSE FILTER. IT WOULD ALSO ELIMINATE
THE NEED TO REHEAT THE FLUE GAS BEFORE IT ENTERS THE
STACK, AND ALSO ELIMINATE SLUDGE DISPOAL PROBLEMS AS
THE FLY ASH AND NAHCOLITE WOULD BE IN DRY FORM.
THE DRY MATERIAL IS, HOWEVER, WATER SOLUBLE SO THIS
WOULD HAVE TO BE CONSIDERED IN DETERMINING A
SUITABLE DISPOSAL METHOD.

ABSTRACT
THE GENERAL OBJECTIVE OF THIS PROJECT IS TO ASSESS MANY SPECIFIC SOCIO-ECONOMIC IMPACTS AND IMPLICATIONS OF COAL AND OIL SHALE DEVELOPMENT AND TO INTEGRATE THESE SEPARATE ASSESSMENTS INTO AN INTERREGIONAL ANALYTICAL SYSTEM. THE SYSTEM CAN THEN BE USED TO MAKE COMPARATIVE ASSESSMENTS OF ALTERNATIVE PATTERNS OF COAL AND OIL SHALE DEVELOPMENT WHICH MIGHT BE CHOSEN BY PRIVATE DECISION-MAKERS AND PUBLIC POLICY-MAKERS. WORK HAS BEGUN ON THE FOLLOWING TASKS: 1. TO PROVIDE REGIONAL REPORTS ON RESOURCES AVAILABLE TO MEET ALTERNATIVE DEMANDS FOR NEW ENERGY, LAND AND WATER RESOURCES WHICH WOULD BE AFFECTED, AND ECONOMIC IMPLICATIONS FOR AGRICULTURE; 2. TO EVALUATE COSTS OF RECLAIMING MINED LANDS AT SPECIFIC SITES, ASSUMING ALTERNATIVE RECLAMATION TECHNOLOGIES; 3. TO DEVELOP AN ANALYTICAL SYSTEM FOR EVALUATING INTERREGIONAL ECONOMIC IMPLICATIONS AND TRADEOFFS FOR AGRICULTURE AND RURAL AREAS RESULTING FROM COAL DEVELOPMENT; 4. TO ASSESS THE DEMAND FOR WATER FOR ENERGY DEVELOPMENT AND THE COMPETITION FOR WATER BETWEEN AGRICULTURE AND ENERGY USE IN COAL MINING AND PROCESSING. (NEO)

ABSTRACT
THE RESEARCH DELINEATED IN THIS PROPOSAL IS A COORDINATED EFFORT TO IMPROVE ENVIRONMENTAL DECISION-MAKING THROUGH DEVELOPMENT AND TESTING OF NEW MEASUREMENT AND ASSESSMENT METHODS. THE EFFORT WILL CONCENTRATE ON IMPROVING BENEFIT MEASUREMENT METHODOLOGIES IN THREE GENERAL AREAS: ENVIRONMENTAL HEALTH, ENVIRONMENTAL AMENITIES AND RECREATION, AND THE EFFECTS OF ENVIRONMENTAL POLLUTION ON PRODUCTIVITY WITHIN THE UNITED STATES ECONOMY. WITHIN THESE GENERAL AREAS, SPECIFIC STUDIES WILL BE UNDERTAKEN TO DEVELOP IMPROVED THEORETICAL STRUCTURES FOR ESTIMATING BENEFITS AND TRADEOFFS. THESE IMPROVED MODELS WILL THEN BE EMPIRICALLY TESTED AND ANALYZED AS TO THEIR VALUE IN ENVIRONMENTAL DECISION-MAKING. IT IS ANTICIPATED THAT IN EACH AREA TWO OR MORE COMPETING THEORETICAL APPROACHES WILL BE TESTED AND COMPARED. IN ADDITION TO THE IMPROVEMENT AND TESTING OF BENEFIT AND ENVIRONMENTAL TRADEOFF RELATIONSHIPS, AN EVALUATION OF DECISION METHODOLOGIES INCLUSIVE OF THE VALUE OF TRADEOFF INFORMATION UTILIZING THE SPECIFIC STUDIES WILL BE UNDERTAKEN.

ABSTRACT
THE STUDY FORECASTED THE POPULATION. EMPLOYMENT. INCOME AND FISCAL BALANCE OF SEVEN COUNTIES AND 34 MUNICIPALITIES IN WEST CENTRAL NORTH DAKOTA AS A RESULT OF PROPOSED ENERGY DEVELOPMENT THROUGH 1994. THE FORECASTS OF THE FOUR ITEMS LISTED ABOVE WERE PRESENTED BY 'LEVEL' OF ENERGY DEVELOPMENT (LEVEL 1. LEVEL 2. LEVEL 3). THE BASIC ANALYTICAL TOOLS USED WERE: 1. COHORT-SURVIVAL DEMOGRAPHIC MODEL: 2. GRAVITY MODEL: 3. INPUT-OUTPUT MODEL: 4. FISCAL IMPACT MODEL.

ABSTRACT
THREE COUNTIES SURROUNDING THE PROPOSED NORTH EXTENSION AND EAST DECKER MINES WERE DEFINED AS THE LOCAL ECONOMIC IMPACT AREA: THEY ARE BIG HORN AND ROSEBUD COUNTIES IN MONTANA. AND SHERIDAN COUNTY IN THE EXTREME NORTHERN PORTION OF WYOMING. THE MAJORITY OF THE ECONOMIC IMPACTS ARE PROJECTED TO OCCUR IN THE CITY OF SHERIDAN IN SHERIDAN COUNTY. THE TRADE AND SERVICES CENTER FOR THE REGION AND LOCATED WITHIN 30 MILES OF BOTH PROJECTS. THE PROPOSED DECKER MINES WILL CREATE DIRECT EMPLOYMENT FOR BASIC WORKERS (MINERS. RAILROAD EMPLOYEES. CONSTRUCTION WORKERS). AS WELL AS RESULT IN THE CREATION OF ADDITIONAL DERIVATIVE JOBS BY AN INCREASE IN THE DEMAND FOR SERVICES AND GOODS. WHEN MEASURED IN TERMS OF EMPLOYMENT. THE MAXIMUM IMPACT OF THE PROPOSED DECKER MINES IS PROJECTED FOR 1980. WHEN THERE WILL BE BETWEEN 792 AND 962 ADDITIONAL EMPLOYMENT OPPORTUNITIES. THE REMOVAL FROM AGRICULTURAL PRODUCTION OF APPROXIMATELY 6.300 ACRES BY FENCING BY THE DECKER COAL COMPANY IS PROJECTED TO REDUCE THE TOTAL OUTPUT OF FARMS AND RANCHES IN THE AREAS. ALTHOUGH THE ADVERSE ECONOMIC IMPACT OF THIS ACTION IS EXPECTED TO BE RELATIVELY MINOR.
THE STATE OF MONTANA AND LOCAL GOVERNMENTS IN THE MONTANA

BEST DOCUMENT AVAILABLE

PORTION OF THE IMPACT AREA ARE PROJECTED TO HAVE SIZABLE REVENUE SURPLUSES FROM THE PROPOSED DECKER MINES. GOVERNMENTS IN WYOMING, HOWEVER, WILL PROBABLY EXPERIENCE DEFICITS, AS THE INCREASE IN OPERATING EXPENDITURES FAR EXCEED THE GROWTH IN REVENUES. THIS RESEARCH IS ADMINISTERED BY THE MONTANA DEPARTMENT OF STATE LANDS WITH DECKER COAL COMPANY FUNDS. (MEO)

ABSTRACT
OBJECTIVE: PROVIDE PRELIMINARY POPULATION PROJECTIONS OF SIZE COMPOSITION AND DISTRIBUTION IN FOUR COUNTIES IN SOUTHEASTERN MONTANA, IN ASSOCIATION WITH LOCAL MINING AND CONSTRUCTION DEVELOPMENT.
APPROACH: EXPLORE SECONDARY DATA SOURCES UTILIZING WHELPTON'S COMPONENTS OF POPULATION METHOD. IT PROVIDES A RANGE OF PROJECTIONS; TAKES INTO ACCOUNT DEMOGRAPHIC CHANGES RESPONSIBLE FOR POPULATION GROWTH; IS INTUITIVELY EASY TO COMPREHEND BY POTENTIAL USERS. EXPLORE ADDITIONAL DATA SOURCES BY COMMUNICATION WITH DEVELOPING COMPANIES. KEYPUNCHING, COMPUTER USE, ANALYSIS AND WRITE-UP.
PROGRESS: FIRST, A REVIEW OF LITERATURE DEALING WITH POPULATION ESTIMATES IN RAPIDLY GROWING AREAS HAS BEEN UNDERWAY IN ORDER TO ASCERTAIN THE MOST SUITABLE ESTIMATING PROCEDURES FOR THE ANALYSIS. SECOND, INTERVIEWS HAVE BEEN TAKEN FROM SEVERAL MAJOR DECISION MAKERS WHO HAVE KNOWLEDGE CONCERNING FUTURE DEVELOPMENT IN COAL DEVELOPMENT IN SOUTHEASTERN MONTANA AS WELL AS THE INFLUENCE TO AFFECT FUTURE GROWTH. THIRD, LIASON HAS BEEN ESTABLISHED WITH THE UNIVERSITY OF MONTANA WHICH IS OPERATING A FIELD STATION IN COLSTRIP, MONTANA. THIS STATION WILL BE AVAILABLE FOR THIS RESEARCH WHEN THE PROJECT PROCEEDS TO THE FIELD.

ABSTRACT
THIS IS A STUDY PURSUANT TO THE DEVELOPMENT OF AN ENVIRONMENTAL IMPACT STATEMENT BY THE DEPARTMENT OF STATE LANDS ON THEIR ACTION RELATING TO SHELL OIL CO.'S PROPOSAL TO OPEN THE 'PEARL' MINE IN BIG HORN COUNTY. THE STUDY HAS TWO PRIMARY ASPECTS: 1. QUANTIFY AND QUALITATIVELY DISCUSS THE HUMAN IMPACTS ON THE LOCAL AREA IMPACT REGION ASSOCIATED WITH THE MINE. 2. EXPLORE AND FORMULATE POSSIBLE GROWTH MANAGEMENT STRATEGIES AVAILABLE TO MINIMIZE, MITIGATE, AND AVOID THE ADVERSE EFFECTS OF MAJOR ENERGY DEVELOPMENT IN A SPARSELY POPULATED RURAL REGION OF MONTANA OR WYOMING. ABSTRACT
THE RESEARCH WAS DESIGNED TO PROVIDE AN OBJECTIVE AND IMPARTIAL VIEW OF THE AREA WHERE SOCIAL STRUCTURE, WAY OF LIFE, AND COMMUNITY SERVICES ARE LIKELY TO BE IMPACTED BY EXPANSION OF MINING OPERATIONS AT DECKER, MONTANA. THE PRINCIPAL STUDY AREA WAS SHERIDAN, WYOMING WHERE THE IMPACT OF MINE EXPANSION WILL BE FAR GREATER THAN ON OTHER COMMUNITIES. A QUESTIONNAIRE WAS ADMINISTERED TO RANDOMLY SELECTED RESPONDENTS, AND VARIOUS REPRESENTATIVE LOCALS WERE IDENTIFIED AND INTERVIEWED IN-DEPTH. (MEO)

ABSTRACT
THE PURPOSE OF THIS STUDY WAS TO ANALYZE ENERGY POLICIES AND NATURAL RESOURCE TAXATION FOR THE STATES IN THE ROCKY MOUNTAIN REGION. THE STUDY MADE SPECIFIC REFERENCE TO COAL, SINCE THE CURRENT AND POTENTIAL FUTURE COAL SITUATION IN THE REGION PROVIDED AN EXCELLENT CASE FOR THE EXAMINATION OF ALTERNATIVE STATE ECONOMIC OBJECTIVES AND PROVIDED A BASIS FOR THE ANALYSIS OF VARIOUS PUBLIC POLICIES THAT COULD BE USED TO ATTAIN THE OBJECTIVES. THE STUDY FOCUSED ON TAXATION RATHER THAN PUBLIC EXPENDITURE POLICIES AS THE PRIMARY MEANS OF ATTAINING STATE OBJECTIVES. THE RATIONALE FOR COAL SEVERANCE TAXES WAS ANALYZED ASSUMING ALTERNATIVE OBJECTIVES FOR THE STATES IN THE ROCKY MOUNTAIN REGION AND TAKING INTO ACCOUNT THE STATES' DIFFERENT DEMAND AND SUPPLY CONDITIONS. ONE IMPORTANT ISSUE THAT WAS CONSIDERED IS WHETHER

ABSTRACT
THE PURPOSE OF THIS STUDY IS TO MONITOR THE SOCIO-ECONOMIC IMPACTS OF THE BLACK THUNDER COAL MINE IN CAMPBELL COUNTY, WYOMING. THE OBJECTIVES INCLUDE: 1. COMPARISON OF ACTUAL IMPACTS WITH PROJECTIONS; 2. COMPARISON OF ACTUAL IMPACTS WITH MITIGATION EFFORTS; 3. IDENTIFICATION OF FUTURE SOCIO-ECONOMIC MITIGATION MEASURES; AND 4. COMPILATION OF CAMPBELL COUNTY SOCIOECONOMIC DATA ON A CONTINUING BASIS. THE METHODOLOGY FOR COMPLETING THIS STUDY IS PRIMARILY DATA COLLECTION AMONG VARIOUS LOCAL DATA SOURCES. THESE DATA WILL BE ANALYZED TO ISOLATE THE BLACK THUNDER MINE IMPACTS FROM OTHER COAL DEVELOPMENTS NEARBY. THIS REPORT WILL BE PRODUCED SEMI-ANNUALLY; THE FIRST WILL BE PUBLISHED BY YEAR-END 1977.

ABSTRACT
THE PURPOSE OF THIS RESEARCH IS TO ASSIST LOCAL PLANNING ORGANIZATIONS IN DEVELOPING AN APPROACH TO MITIGATING NEGATIVE SOCIOECONOMIC IMPACTS STEMMING FROM NEARBY COAL AND URANIUM DEVELOPMENT. THE TWO PRIMARY OBJECTIVES WERE: 1. TO PLACE THE TOWN OF RAWLINS, WYOMING IN PERSPECTIVE WITH OTHER WYOMING BOOM TOWNS; AND 2. TO IDENTIFY MEASURES AND APPROACHES FOR AMELIORATING NEGATIVE SOCIOECONOMIC IMPACTS. THE RESEARCH METHODOLOGY CONSISTED OF PRIMARY DATA COLLECTION IN A NUMBER OF WYOMING COMMUNITIES, AND INTERVIEWS WITH LOCAL, STATE AND FEDERAL GOVERNMENT OFFICIALS. THIS REPORT IS IN FINAL STAGES OF DRAFT REVIEW.

ABSTRACT
THE GENERAL OBJECTIVE OF THIS PROJECT IS TO REDUCE UNEMPLOYMENT AMONG INDIAN PEOPLE BY PROVIDING A MEANS FOR NORTH DAKOTA AND MONTANA INDIAN PEOPLE TO SEEK AND SUCCESSFULLY COMPETE FOR JOBS IN THE NEWLY EXPANDING LIGNITE INDUSTRY IN THESE STATES. MORE SPECIFICALLY, THE INDIAN LIGNITE MANPOWER PROJECT WILL 1. COLLECT INFORMATION REGARDING THE SIZE AND COMPOSITION OF THE AVAILABLE INDIAN LABOR FORCE FROM RESERVATIONS IN NORTH DAKOTA AND WESTERN MONTANA AND FROM URBAN AREAS NEAR THESE RESERVATIONS; 2. DEVELOP WORKING RELATIONSHIPS WITH COMPANIES PRESENTLY OR POTENTIALLY INVOLVED IN LIGNITE DEVELOPMENT IN ORDER TO DETERMINE THEIR MANPOWER NEEDS, TO PROVIDE TRAINING FOR COMPANY PERSONNEL IN HIRING AND RETAINING INDIAN PEOPLE, AND TO DEVELOP ASSURANCES FROM THE COMPANIES THAT INDIAN PEOPLE WILLING TO TRAIN, AND IF NECESSARY RELOCATE, WOULD HAVE AN OPPORTUNITY TO OBTAIN EMPLOYMENT; 3. DEVELOP WORKING RELATIONSHIPS WITH RELEVANT LABOR UNIONS TO INSURE THAT INDIAN PEOPLE INTERESTED IN LIGNITE EMPLOYMENT WOULD NOT ENCOUNTER MEMBERSHIP BARRIERS AND THAT THEY WOULD HAVE SOME PROMISE OF A PORTION OF THE APPRENTICESHIP POSITIONS; 4. WORK WITH EXISTING VOCATIONAL EDUCATION INSTITUTIONS AND OTHER SPONSORS TO DEVELOP SPECIFIC TRAINING PROGRAMS IN HIGH NEED AREAS AND TO FACILITATE THE ENTRY OF INTERESTED INDIAN PEOPLE INTO THOSE PROGRAMS; AND 5. INITIATE AN INTENSIVE AND EFFECTIVE RECRUITING ACTIVITY, PLUS MECHANISMS FOR ITS CONTINUATION AFTER TERMINATION OF THE PROJECT, WHICH WOULD MOVE INTERESTED INDIAN PEOPLE INTO EMPLOYMENT IN THE CONSTRUCTION AND OPERATION PHASES OF COAL MINING AND COAL CONVERSION FACILITITES, OR, IF NEEDED, INTO TRAINING AND THEN INTO THOSE POSITIONS. ABSTRACT
RECENTLY, A RESERVATION MANPOWER SURVEY WAS CONDUCTED FOR THE INDIAN LIGNITE MANPOWER PROGRAM TO DETERMINE THE SIZE AND COMPOSITION OF THE RESERVATION LABOR FORCE INTERESTED IN LIGNITE INDUSTRY EMPLOYMENT. THE INDIANS INTERVIEWED RANKED 'STEADY WORK WITH NO LAYOFFS' AND 'HIGH PAY' AS THE MOST IMPORTANT CRITERIA FOR JOB SATISFACTION, AND SUCH SERVICES AS 'HELP WITH PERSONAL PROBLEMS' AS LEAST IMPORTANT. WHILE ATTITUDES AND BEHAVIOR MAY NOT ALWAYS BE CONSISTENT, IT IS POSSIBLE THAT PART OF THE EXPLANATION FOR LOW JOB RETENTION AMONG INDIANS

BEST DOCUMENT AVAILABLE

MAY BE ATTRIBUTED TO THE TYPES OF JOBS HELD BY INDIANS AND THEIR ACCOMPANYING WAGE RATES. FOR THIS REASON WE WISH TO STRATIFY INDIAN AND NON-INDIAN EMPLOYEES ON THE BASIS OF HIGH, MEDIUM OR LOW WAGES EARNED. BY 'CONTROLLING' FOR WAGES, THE COMPARISONS OF RETENTION RATES FOR INDIAN/NON-INDIAN EMPLOYEES WILL MORE REALISTICALLY REFLECT THE SEVERITY OF THE PROBLEM. THE POPULATION HAVING THE GREATEST RETENTION PROGRAM NEEDS, AND THE DIFFERENT KINDS OF RETENTION PROGRAMS NEEDED. THERE SHALL BE THREE PHASES OF WORK FOR THIS STUDY: A LITERATURE REVIEW, A SURVEY OF LIGNITE FIRMS AND A SURVEY OF RETAINED AND NON-RETAINED INDIAN EMPLOYEES.

I. LITERATURE REVIEW. IMPACT SHALL UNDERTAKE AN EXTENSIVE LITERATURE REVIEW OF JOB RETENTION PROGRAMS IN GENERAL AND JOB RETENTION PROGRAMS FOR INDIAN PEOPLE IN PARTICULAR.

II. SURVEY OF LIGNITE INDUSTRY FIRMS. THE INFORMATION REQUIRED WILL BE: 1. THE NAMES, FORMER ADDRESSES, AND FORWARDING ADDRESSES OF UNRETAINED INDIAN EMPLOYEES; 2. THE NUMBER OF INDIAN PEOPLE CURRENTLY EMPLOYED IN HIGH, MEDIUM AND LOW WAGE POSITIONS; 3. THE NUMBER OF NON-INDIAN PEOPLE CURRENTLY EMPLOYED IN HIGH, MEDIUM AND LOW WAGE POSITIONS; 4. THE NUMBER OF INDIAN PEOPLE NOT RETAINED IN HIGH, MEDIUM AND LOW WAGE POSITIONS DURING THE PAST TWO YEARS; 5. THE NUMBER OF NON-INDIAN PEOPLE NOT RETAINED IN HIGH, MEDIUM AND LOW WAGE POSITIONS DURING THE PAST TWO YEARS; 6. DEMOGRAPHIC CHARACTERISTICS OF INDIAN LIGNITE EMPLOYEES, E.G., TRIBE, SEX, AGE, EDUCATION, LENGTH OF TIME OFF THE RESERVATION, ETC.

III. SURVEY OF RETAINED AND UNRETAINED INDIAN EMPLOYEES. IMPACT WILL CONDUCT A SURVEY OF RETAINED AND UNRETAINED INDIAN EMPLOYEES. THE SURVEY QUESTIONS WILL BE DEVELOPED IN CLOSE COOPERATION WITH THE UTETC PROJECT OFFICER, AND THE SURVEY WILL ALSO INCLUDE QUESTIONS DEEMED IMPORTANT THROUGH THE LITERATURE REVIEW.

ABSTRACT
THE OBJECTIVE OF THIS PROPOSED RESEARCH IS TO INVESTIGATE THE EFFECTS OF SOLVENT CHARACTERISTICS ON THE EXTENT OF WYODAK COAL LIQUEFACTION, ASPHALTENE FORMATION, AND NITROGEN REMOVAL DURING THE NON-CATALYTIC HYDROGENATION OF WYODAK COAL. THE RESEARCH IS DIVIDED INTO THREE MAJOR AREAS AS FOLLOWS: 1. REACTOR EXPERIMENTS. PROCESSING WYODAK COAL IN A SERIES OF SOLVENTS TO INCLUDE SOLVENT REFINED COAL (SRC) PROCESS RECYCLE OILS, COAL TAR DISTILLATES AND OTHER SOLVENTS, BOTH AS RECEIVED AND MODIFIED, FOR EXAMPLE BY PREHYDROGENATION OR BLENDING, UNDER REACTION CONDITIONS REPRESENTATIVE OF SRC PROCESSES. 2. CHEMICAL ANALYSES. A. STANDARD CHEMICAL ANALYSES; B. SOLVENT CHARACTERIZATION; C. NITROGEN CLASSES. 3. ANALYSIS OF DATA. EVALUATION OF THE PRECISION OF THE REACTION DATA AND CORRELATION OF THE VARIABLES STUDIED.

LOCATION

NATIONWIDE

ABSTRACT

THE U.S. OFFICE OF TECHNOLOGY ASSESSMENT IS PERFORMING A TECHNOLOGY ASSESSMENT OF COAL PIPELINES AT THE REQUEST OF SEVERAL COMMITTEES OF THE HOUSE AND SENATE. FEDERAL LEGISLATION TO PROVIDE OR FOSTER THE TRANSPORTATION OF COAL SLURRY BY PIPELINE HAS BEEN CONSIDERED BY THE CONGRESS FOR OVER 10 YEARS AND HAS BEEN A SUBJECT UNDER ACTIVE DELIBERATION SINCE 1974. AMONG THE LEGISLATIVE CONCERNS EXPRESSED IN REQUESTS FOR AN ASSESSMENT OF THE COAL SLURRY PIPELINE TECHNOLOGY AND ITS RELATIVE ADVANTAGES AND DISADVANTAGES ARE QUESTIONS REGARDING POTENTIAL IMPACTS UPON THE ENVIRONMENT, POTENTIAL IMPACTS UPON OTHER POSSIBLE MODES OF TRANSPORTATION, AND POTENTIAL IMPACTS ON THE CONSUMPTION OF WATER IN AREAS WHERE COAL MINING ACTIVITY IS EXPECTED TO INCREASE IN THE COMING YEARS. THE ASSESSMENT IS EXPECTED TO INCLUDE SUCH MATTERS AS: 1. A NUMBER OF TECHNOLOGICAL, ENERGY AND LEGAL ISSUES; 2. ENVIRONMENTAL EFFECTS WITH EMPHASIS ON WATER, LAND USE AND COMMUNITY PLANNING; AND 3. EVALUATION OF THE COSTS, RETURNS AND IMPACTS OF SLURRY PIPELINES ON THE RAILROADS. THE RESULTS OF THE ASSESSMENT WILL BE PRESENTED IN A FORM WHICH CLEARLY DEFINES AND ANALYZES ALTERNATIVE COURSES OF ACTION. (NEG)

REPORTS AND PUBLICATIONS

A FINAL REPORT WILL BE AVAILABLE UPON COMPLETION OF THE ASSESSMENT.

ABSTRACT

THE SPECIFIC OBJECTIVE IS TO ADDRESS THE ISSUES CONCERNING WATER RIGHTS, EMINENT DOMAIN, COMMON CARRIER STATUS, APPLICABLE PROVISIONS OF THE INTERSTATE COMMERCE ACT, AND ENVIRONMENTAL PROTECTION. THE EXISTING LEGAL SYSTEMS, INCLUDING RELEVANT STATUTES, REGULATORY POLICIES, AND JUDICIAL PRECEDENTS, ARE TO BE DESCRIBED AND DISCUSSED WITH PARTICULAR ATTENTION TO CONTRASTING THE FRAMEWORK FOR COAL SLURRY PIPELINES WITH THE REGULATORY ENVIRONMENT FOR RAILROADS AND FOR OTHER SIMILAR OR COMPETING TRANSPORTATION MODES. SPECIFIC TASKS INCLUDE: 1. WATER RIGHTS. PRESENT SLURRY PIPELINE TECHNOLOGY AND ECONOMICS GENERALLY REQUIRE THAT THE COAL TO BE TRANSPORTED BE MIXED WITH AN APPROXIMATELY EQUAL AMOUNT BY WEIGHT OF WATER. SINCE PIPELINES HAVE BEEN PROPOSED AS A MEANS OF TRANSPORTING COAL FROM WESTERN STATES WHERE WATER IS RELATIVELY SCARCE, THE USE OF THIS RESOURCE HAS BEEN A CENTRAL ISSUE. 2. EMINENT DOMAIN. PROPONENTS OF COAL SLURRY PIPELINE DEVELOPMENT MAINTAIN THAT THE POWER OF EMINENT DOMAIN IS NECESSARY IN ORDER TO CROSS RAILROAD RIGHTS OF WAY. THE PRECEDENTS SHALL THEREFORE BE REVIEWED FOR GRANTING THIS POWER FOR SIMILAR PURPOSES AT BOTH THE FEDERAL AND STATE LEVELS. PARTICULAR ATTENTION SHALL BE PAID TO THE CONDITIONS GENERALLY CONSIDERED TO BE NECESSARY OR SUFFICIENT TO JUSTIFY THE CONDEMNATION OF PRIVATE PROPERTY IN THIS WAY, AND THE EXTENT TO WHICH THOSE CONDITIONS APPLY

BEST DOCUMENT AVAILABLE

TO SLURRY PIPELINES. 3. COMMON CARRIER STATUS. THE CONTRACTOR SHALL EXPLAIN THE CONDITIONS UNDER WHICH A COAL SLURRY PIPELINE WOULD BE REQUIRED TO SERVE AS A COMMON CARRIER, AND TO DESCRIBE WHAT COMMON CARRIER STATUS WOULD MEAN IN PRACTICAL TERMS FOR A TRANSPORTATION MODE OF THIS NATURE. THE ASSOCIATED PRIVILEGES AND OBLIGATIONS SHALL BE COMPARED WITH THOSE OF COMMON CARRIERS BY RAILROAD, WATERWAY, AND OTHER MODES INCLUDING PIPELINES CARRYING OTHER COMMODITIES. 4. INTERSTATE COMMERCE ACT PROVISIONS. THE CONTRACTOR SHALL REVIEW THE INTERSTATE COMMERCE ACT FOR PROVISIONS APPLICABLE TO COAL SLURRY PIPELINES; ANY REQUIREMENTS WHICH AFFECT THE ABILITY OF RAILROADS OR OTHER MODES TO COMPETE WITH THEM SHALL BE IDENTIFIED. 5. ENVIRONMENTAL PROTECTION. ENVIRONMENTAL PROTECTION STATUTES AND REGULATORY POLICIES MAY INFLUENCE THE EXTENT TO WHICH PIPELINE SYSTEMS CAN BE DEVELOPED AND MAY ALTER THE PROSPECTIVE COMPETITIVE BALANCE WITH ESTABLISHED MODES.

ABSTRACT
THIS STUDY ADDRESSES THE ECONOMIC AND COMPETITIVE IMPACTS OF COAL SLURRY PIPELINES, WHICH HAVE BEEN A CONTINUING SOURCE OF CONCERN DURING CONGRESSIONAL CONSIDERATIONS OF LEGISLATION PERTAINING TO THIS TECHNOLOGY. THE SPECIFIC OBJECTIVE IS TO ADDRESS THE ISSUES OF COSTS, RATES, AND COMPETITIVE EFFECTS ON OTHER MODES OF TRANSPORTATION. THE ECONOMIC IMPACTS THAT WOULD ARISE FROM THE WIDESPREAD INTRODUCTION OF SLURRY PIPELINES TO MEET PROJECTED COAL TRANSPORTATION NEEDS SHALL BE ASSESSED, AS WELL AS THE ECONOMIC IMPACTS OF MEETING THESE SAME NEEDS BY EXPANDING RAILROADS AND OTHER EXISTING TRANSPORTATION MODES. IN ORDER TO ANALYZE THESE ISSUES OBJECTIVELY, THE CONTRACTOR SHALL DEVELOP DATA ON PIPELINE AND RAIL CAPITAL AND OPERATING COSTS AND THEN RELATE THEM TO PIPELINE AND RAIL RATES. PARTICULAR CARE SHALL BE TAKEN TO SEPARATE COST AND RATE DATA AND TO CONSIDER THE ENTIRE PROCESS FROM THE MINEMOUTH TO THE POINT OF CONSUMPTION. THE CONTRACTOR SHALL NCLUDE IN HIS ANALYSIS THE COSTS ASSOCIATED WITH PROVIDNG COMPETITIVE LEVELS OF SAFETY, RELIABILITY, FLEXIBILITY, AND PROMPTNESS OF SERVICE; AND ALTERNATELY, THE COST TO CONSUMERS OF INSURING AGAINST THE RISKS, OR OF ABSORBING THE COSTS DUE TO THE RELATIVE SHORTCOMINGS OF A GIVEN MODE.
THE STUDY EXPLORES THE VARIETY OF IMPORTANT IMPACTS WHICH MIGHT FOLLOW THE EXPANSION OF ALTERNATIVE MODES TO MEET PROJECTED LEVELS OF COAL TRANSPORTATION DEMAND. 1. IMPACTS ON PRODUCERS, SHIPPERS AND CONSUMERS (COST AND SERVICE QUALITY). A. COAL; B. ELECTRICITY; C. AGRICULTURAL PRODUCTS; D. OTHER COMMODITIES. 2. CAPITAL REQUIREMENTS (TIME SPECIFIC). A. PIPELINES; B. RAIL; C. OTHER MODES. 3. IMPACTS ON REGIONAL AND NATIONAL ECONOMIC OUTLOOK (LONG AND SHORT TERM). A. EMPLOYMENT (BY SKILL CATEGORY); B. REGIONAL AND NATIONAL PRODUCTS; C. INFLATION. 4. IMPACTS ON OTHER TRANSPORTATION MODES. A. RAIL; B. OTHER. 5. IMPACTS ON FEDERAL, STATE AND LOCAL GOVERNMENT. A. TAXES; B. REQUIRED SERVICES; C. OTHER IMPACTS.

ABSTRACT
SCIENCE APPLICATIONS, INC. (SAI) IS CURRENTLY PERFORMING FOR THE U.S. CONGRESS, OFFICE OF TECHNOLOGY ASSESSMENT, AN INDEPENDENT, OBJECTIVE ANALYSIS OF THE ENVIRONMENTAL IMPACTS OF COAL SLURRY PIPELINES AND UNIT TRAINS. TO MAKE THE ANALYSIS AS REALISTIC AS POSSIBLE, HYPOTHETICAL SCENARIOS ARE BEING EXAMINED. THESE INCLUDE SHIPMENT OF VARIOUS AMOUNTS OF COAL BETWEEN 1985 AND 2040, BY NEW COAL SLURRY PIPELINES OR BY EXPANDED SERVICE OVER EXISTING RAIL LINES, BETWEEN THE FOLLOWING ORIGIN-DESTINATION PAIRS: GILLETTE, WYOMING TO FT. WORTH/DALLAS AND HOUSTON, TEXAS; COLSTRIP, MONTANA TO BECKER, MINNESOTA AND PORTAGE, WISCONSIN; TRACY CITY, TENNESSEE TO TAMPA AND FT. LAUDERDALE, FLORIDA; AND PRICE, UTAH TO BARSTOW, CALIFORNIA. A MAJOR PART OF THE WYOMING-TEXAS CASE STUDY IS A CRITICAL REVIEW OF ALL MAJOR ISSUES INVOLVING THE MADISON FORMATION. THE CASE STUDIES, ALONG WITH MORE GENERAL RESEARCH, ARE INTENDED TO SHED LIGHT ON THE FOLLOWING ENVIRONMENTAL ISSUES ASSOCIATED WITH COAL SLURRY PIPELINES: PIPELINE SYSTEM WATER REQUIREMENTS, IMPACTS UPON ALTERNATIVE WATER USES, CHEMICAL INTERACTIONS BETWEEN COAL AND WATER IN THE SLURRY PIPELINE, PIPELINE RIGHT-OF-WAY REVEGETATION, RE-USE ALTERNATIVES AND IMPACTS, INDIRECT AIR POLLUTION EMISSIONS, ENERGY AND MATERIAL REQUIREMENTS, SPILLS, AND ALTERNATIVE WATER SOURCES. ISSUES ASSOCIATED WITH INCREASED UNIT TRAIN OPERATIONS ARE: NOISE, RAIL-HIGHWAY GRADE CROSSING ACCIDENTS, FIRES, DIESEL EMISSIONS, ENERGY AND MATERIAL REQUIREMENTS AND SOCIAL IMPACTS. A MAIN OBJECTIVE OF THE STUDY IS TO DEVELOP GENERALIZABLE METHODOLOGIES FOR QUANTIFYING IMPACTS IN MOST OF THESE AREAS.

ABSTRACT
THE CURRENT ERDA GOAL FOR AN ELECTRICAL UTILITY FUEL CELL OPERATING DIRECTLY OR INDIRECTLY ON COAL APPEAR TO BE SERVED BEST BY HIGH TEMPERATURE FUEL CELL TECHNOLOGY--EITHER THE MOLTEN CARBONATE ELECTROLYTE SYSTEM, OR THE SOLID ELECTROLYTE SYSTEM. THESE SYSTEMS HAVE THE BEST POTENTIAL FOR THE ELECTRO-OXIDATION OF COAL AND COAL-DERIVED SECONDARY FUELS BECAUSE OF THEIR ABILITY TO PROVIDE HIGH TEMPERATURE ACTIVATION OF FUELS WITH ATTENDANT SIMPLIFIED ELECTROCATALYTIC PROBLEMS. MERDI HAS BEGUN WORK ON A $247,000, 18-MONTH PROGRAM DIRECTED AT FINDING MATERIALS FOR FUEL CELL ALTERNATIVES TO OVERCOME THE MATERIAL PROBLEMS ASSOCIATED WITH HIGH TEMPERATURE FUEL CELLS. THE WORK CONSISTS OF TWO SEPARATE TASKS: 1. DEVELOPMENT OF MATERIALS WITH MICROSTRUCTURAL PROPERTIES SUITABLE FOR THE CONTAINMENT OF MOLTEN CARBONATE ELECTROLYTES FOR THE 40,000-HOUR OR LONGER LIFETIME OF A FUEL CELL OPERATING IN THE TEMPERATURE RANGE OF 450-900 DEGREES C.
2. EVALUATION OF THE PROPERTIES OF CONSTRUCTION MATERIALS AND SOLID ELECTROLYTE MATERIALS DEVELOPED FOR ELECTRODES IN THE MHD PROGRAM AND DETERMINATION OF METHODS TO MODIFY THESE MATERIALS. (MEO)

ABSTRACT
THE PRIMARY PROBLEM ASSOCIATED WITH A DRAGLINE SURFACE MINING SYSTEM IS THAT THE COMBINATION OF A MEANDERING HIGHWALL, DEEP OVERBURDEN, AND UNDULATING TERRAIN MAY NECESSITATE COSTLY AND UNPRODUCTIVE REHANDLING OF SPOIL MATERIAL. THE TERRACE-PIT CONCEPT PERMITS TOTAL, DIRECT PLACEMENT OF OVERBURDEN MATERIALS, THEREBY ELIMINATING THE SPOIL REHANDLING PROBLEMS ASSOCIATED WITH A DRAGLINE OPERATION. THE EQUIPMENT UTILIZED BY A TERRACE-PIT SYSTEM CONSISTS ESSENTIALLY OF MOBILE UNITS FOR OVERBURDEN REMOVAL, SPOIL HANDLING, AND COAL EXTRACTION AND HAULAGE. BECAUSE THIS TYPE OF EQUIPMENT IS READILY AVAILABLE, A NEW MINE CAN BE BROUGHT

BEST DOCUMENT AVAILABLE

INTO PRODUCTION IN A RELATIVELY SHORT PERIOD OF TIME AS COMPARED TO THE LONG LEAD TIMES REQUIRED FOR THE DELIVERY AND CONSTRUCTION OF A DRAGLINE. THE TERRACE-OR BENCHED-PIT SYSTEM IS AMENABLE TO FLAT, GENTLY ROLLING OR SLOPING TOPOGRAPHY, PITCHING SEAMS, AND IRREGULARLY-SHAPED PERMIT AREAS. IN ADDITION, SELECTIVE OVERBURDEN PLACEMENT IS EASILY INTEGRATED INTO THE SYSTEM. THE TERRACE AND SPOIL BENCHES CAN BE DESIGNED TO ALLEVIATE HIGHWALL AND SPOIL INSTABILITY PROBLEMS AND MINIMUM DOZER TIME IS REQUIRED FOR SPOIL LEVELING. FURTHER EXAMINATION OF THE TERRACE-PIT CONCEPT UNDER VARYING OPERATING CONDITONS AND EQUIPMENT COMBINATIONS IS WARRANTED TO ESTABLISH ITS ECONOMIC AND PHYSICAL LIMITATIONS AND PRACTICALITY.

ABSTRACT
A UNIQUE SITUATION EXISTS IN THE HIGH PLAINS AREA OF THE WEST: THIN COAL SEAMS THAT CONSIST OF LOW QUALITY COAL WOULD NOT BE SURFACE MINED IF IT WERE NOT FOR THICK UNDERLYING COAL SEAMS. THE PRINCIPAL PROBLEM FOUND IN THIN SEAM MINING IS THE DELAY IN EXPOSING THE UNDERLYING MAJOR PRODUCTION SEAMS. THE DELAY CAN BE MEASURED BY THE LOSS OF PRIME STRIPPING EQUIPMENT UTILIZATION, EQUIPMENT SCHEDULING FOR COAL REMOVAL, DEVELOPMENT OF METHODS FOR THIN SEAM ACQUISITION AND SPECIALIZED EQUIPMENT REQUIREMENTS. IN SOME CASES, THE STRIPPING DRAGLINE MUST REMOVE THE OVERBURDEN TO THE THIN SEAM, MOVE TO ANOTHER LOCATION, AND THEN RETURN UPON COAL REMOVAL TO STRIP TO THE PRINCIPAL SEAM. MOVING CREATES SCHEDULING PROBLEMS AND POOR UTILIZATION OF THE PRIME STRIPPER. EXTRA EQUIPMENT, MORE LABOR INTENSIVE, IS REQUIRED FOR THE THIN SEAM REMOVAL BECAUSE THIN SEAMS MUST BE RIPPED AND DOZED OR LOADED OUT WITH SCRAPERS AND FRONT-END LOADERS. IN SOME CASES, THE PARTING BETWEEN SEAMS MUST BE REHANDLED. THE EXISTENCE AND REMOVAL OF THIN SEAMS MAY REPRESENT ONLY ABOUT 4 TO 10 PERCENT OF THE TOTAL RESOURCE. IN THESE CASES, IF NOT FOR REGULATIONS REQUIRING REMOVAL OF THIN SEAMS, AND FOR THE LACK OF ECONOMIC METHODS TO REMOVE THE COAL SEAMS, THE MOST ECONOMIC ALTERNATIVE MAY BE TO STRIP THROUGH THE SEAM AND SPOIL THE COAL. THE OBJECTIVE OF THIS PROJECT IS TO DEVELOP ECONOMIC, PRACTICAL MINING TECHNIQUES FOR THE REMOVAL OF THESE OVERLYING THIN COAL SEAMS.

ABSTRACT
AN INVENTORY WILL BE PREPARED OF HISTORIC PLACES, STRUCTURES, AND DISTRICTS FOR 31 NORTH DAKOTA COUNTIES NOT INCLUDED IN CONTRACT 9-01-3 AND A SERIES OF MAPS WILL BE PREPARED THAT WILL ILLUSTRATE THE LOCATIONS OF THESE SITES. THE 31 COUNTIES ARE BARNES, BENSON, BOTTINEAU, CASS, CAVALIER, DICKEY, EDDY, FOSTER, GRAND FORKS, GRIGGS, KIDDER, LAMOURE, LOGAN, MCINTOSH, NELSON, PEMBINA, PIERCE, RAMSEY, RENVILLE, RANSOM, RICHLAND, ROLETTE, SARGENT, SHERIDAN, STEELE, STUTSMAN, TOWNER, TRAILL, WALSH, WARD, WELLS. HISTORIC SITES WILL BE IDENTIFIED AND LOCATED BY MEANS OF EXTENSIVE EXAMINATION OF PUBLISHED AND UNPUBLISHED LITERATURE IN THE LIBRARIES OF THE UNIVERSITY OF NORTH DAKOTA, NORTH DAKOTA STATE UNIVERSITY, AND THE NORTH DAKOTA STATE HISTORICAL SOCIETY, AND IN REGIONAL AND LOCAL LIBRARIES THROUGHOUT THE STATE. ALL SITES INVENTORIED WILL BE TABULATED BY COUNTY. THE TABULATION WILL INCLUDE THE FOLLOWING INFORMATION: 1. LOCATION OF SITES ACCORDING TO THE TOWNSHIP-RANGE SYSTEM; 2. HISTORICAL FUNCTION AND SIGNIFICANCE; 3. AN EVALUATION OF EACH SITE IN TERMS OF ITS SIGNIFICANCE IN NORTH DAKOTA HISTORY FOR FUTURE CONSIDERATION. A BIBLIOGRAPHY WILL DOCUMENT THE SOURCES OF INFORMATION CONCERNING THE LOCATION AND HISTORICAL SIGNIFICANCE OF EACH SITE IN THE EVENT OF FUTURE ENERGY DEVELOPMENT ON OR NEAR THE SITES.

ABSTRACT
A MAJOR OBJECTIVE OF THIS STUDY IS TO PLACE MONTANA'S NATURAL GAS CRISIS IN PERSPECTIVE, TO PROVIDE A FRAMEWORK WITHIN WHICH VARIOUS ALTERNATIVES MAY BE EVALUATED, AND TO STIMULATE REASONED AND COMPETENT PUBLIC DISCUSSION CONCERNING WHAT COULD BE DONE TO SECURE NATURAL GAS SUPPLIES SUFFICIENT TO MEET MONTANA'S SHORT-TERM AND LONG-TERM NEEDS. THE STUDY AUDRESSES MANY ISSUES, INCLUDING: MONTANA'S RELIANCE ON CANADIAN GAS IMPORTS; THE EXTENT TO WHICH THE FUTURE OF MONTANA'S ECONOMY IS DEPENDENT ON THE AVAILABILITY AND COST OF GAS; THE ROLE ENERGY CONSERVATION CAN PLAY IN REDUCING GAS DEMAND, AND HOW IT CAN BE ENCOURAGED IN MONTANA; WHETHER INDUSTRIAL CONSUMERS ARE PLANNING TO SHIFT TO OTHER FUELS, AND HOW MUCH GAS CAN BE FREED THEREBY FOR OTHER USES; AND WHETHER SYNTHETIC GAS CAN BE PRODUCED AND CONSUMED ECONOMICALLY IN MONTANA. ABSTRACT
THE OBJECTIVES OF THIS RESEARCH ARE TO PROVIDE ADDITIONAL INFORMATION ABOUT OILSHALE ORGANIC MATERIAL AND TO DEVELOP NEW AND MORE ECONOMICAL METHODS OF CONVERTING OILSHALE KEROGEN TO USEFUL PRODUCTS IN A MANNER THAT HAS MINIMUM ENVIRONMENTAL IMPACT. WHEN POSSIBLE, CONVERSION REACTIONS ARE STUDIED AT THE BENCH-SCALE LEVEL UNTIL SUFFICIENT DATA ARE OBTAINED TO EVALUATE THE MERITS OF THE REACTION. PRESENTLY, FIVE DIFFERENT PHASES OF THE RESEARCH PROBLEM ARE BEING UNDERTAKEN: THE CO-H2O REACTION OF CONVERTING OILSHALE KEROGEN TO SOLUBLE PRODUCTS; THE CHARACTERIZATION OF THE PRODUCTS OBTAINED FROM THE CO-H2O REACTION OF OILSHALE KEROGEN; THE CHARACTERIZATION OF THE ACIDIC COMPONENTS IN KEROGEN OXIDATION PRODUCTS AND BLACK WATERS FROM THE GREEN RIVER FORMATION; THE DEGRADATION OF OILSHALE KEROGEN BY MOLTEN SALTS AT LOW TEMPERATURES AND THE STABILIZATION OF SHALE OIL NAPHTHA BY LOW-TEMPERATURE OXIDATION. THE CHARACTERIZATION OF THE SOLUBLE ORGANIC MATERIAL PRESENT IN OILSHALE RELATIVE TO ORGANIC GEO-

BEST DOCUMENT AVAILABLE

CHEMICAL IMPLICATIONS IS ALSO AN IMPORTANT PART OF THIS STUDY. CONTINUAL DEVELOPMENT OF NEW AND UNTRIED METHODS OF DEGRADING OILSHALE KEROGEN AND THE ELUCIDATION OF STRUCTURAL FEATURES OF THE KEROGEN AND SOLUBLE BITUMEN PRESENT IN OIL SHALE ARE PRIME GOALS OF THIS RESEARCH.

ABSTRACT

WITH THE INCREASING DEMAND FOR ENERGY RESOURCES IN THE UNITED STATES, EXPLORATION MUST BE DIRECTED TOWARD SUBECONOMIC RESOURCES. RECENT RESOURCE ESTIMATES HAVE INDICATED THAT MAJOR GAS ACCUMULATIONS ARE ENTRAPPED IN TIGHT RESERVOIRS IN THE ROCKY MOUNTAIN REGION. TO DATE, MOST STUDIES HAVE FOCUSED ON RECOVERY TECHNOLOGY. BASIC GEOLOGICAL STUDIES, SUCH AS THE ONE INITIAED, HAVE NOT BEEN DONE, BUT WILL AID STIMULATION AND RECOVERY RESEARCH PLUS HELP IN OBTAINING MORE ACCURATE RESOURCE ESTIMATES. THE PURPOSE OF THIS PROJECT IS TO CHARACTERIZE THE TIGHT RESERVOIRS OF THE NORTHERN GREAT PLAINS. THIS AREA IS IMPORTANT BECAUSE IT MAY CONTAIN AS MUCH AS 100 TCF OF NATURAL GAS AT SHALLOW DEPTHS (LESS THAN 1,200M). THIS TYPE OF NATURAL GAS, WHICH WAS GENERATED BY ANAEROBIC BACTERIA AT SHALLOW DEPTHS IN ACCUMULATING SEDIMENTS, HAS BEEN GENERALLY OVERLOOKED IN THE PAST. HOWEVER, RECENT DISCOVERIES IN CANADA AND THE USSR HAVE SHOWN THE SIGNIFICANCE OF THESE BIOGENIC GAS ACCUMULATIONS. IN ADDITIONS, THIS GAS IS ENTRAPPED IN THIN, DISCONTINUOUS SILTSTONES AND SANDSTONES DEPOSITED IN AN OFFSHORE SHELF ENVIRONMENT, A TYPE OF DEPOSIT THAT HAS BEEN RELATIVELY UNSTUDIED IN THE GEOLOGIC RECORD. (MEO)

PROJECT TITLE

A STUDY OF THE POTENTIAL FOR ADDITIONAL NATURAL GAS AND CONDENSATE PRODUCTION FROM MONTANA FORMATIONS

INVESTIGATORS

DR. MAHER A. IBRAHIM

RESEARCH INSTITUTION

MONTANA COLLEGE OF MINERAL SCIENCES AND TECHNOLOGY, DEPT. OF PETROLEUM ENG. / BUTTE, MT 59701

PRIMARY SPONSOR

U.S. FEDERAL ENERGY ADMINISTRATION

PRIMARY FUNDING AMOUNT

3,000 (THIS SUM IS INCLUDED IN THE OVERALL FIGURE GIVEN FOR THE NORTHERN TIER CRUDE OIL STUDY.)

TIME FRAME

MAY 1976 TO JULY 1976

STATUS

COMPLETED

LOCATION

MT

ABSTRACT

THE MAIN PURPOSE OF THIS STUDY IS TO INDEPENDENTLY EXAMINE EXISTING INFORMATION ON NATURAL GAS PRODUCTION, EXPLORATION, RESERVES AND EXPECTED NEW DISCOVERIES. RESULTS WILL HELP TO DETERMINE THE POSSIBILITIES OF COMPLETE OR PARTIAL REPLACEMENT OF THE CURTAILED CANADIAN REFINERY FEEDSTOCKS BY MONTANA PRODUCED FOSSIL HYDROCARBONS. THE OBJECTIVES CAN BE SUMMARIZED AS AN EFFORT TO FIND ANSWERS TO SOME OR ALL OF THE FOLLOWING QUESTIONS: 1. WHAT ARE THE POSSIBILITIES OF NEW GAS-CONDENSATE FIELDS DISCOVERIES? 2. WHAT ARE THE POSSIBILITIES OF THE INCREASE OF MONTANA CRUDE OIL PRODUCTION THROUGH EITHER NEW OIL DISCOVERIES OR USE OF ADVANCED RECOVERY METHODS APPLIED ON PRESENT PRODUCING FIELDS? 3. TO WHAT DEGREE MIGHT THE EXPECTED DISCOVERIES KEEP PACE WITH THE ANNOUNCED CANADIAN PHASEOUT OF EXPORTS OF REFINERY FEEDSTOCKS TO MONTANA? 4. WHAT ARE SUFFICIENT INDUSTRIAL CONDITIONS TO ACHIEVE THE GOAL OF COMPLETE REPLACEMENT OF CANADIAN EXPORTS THROUGH MONTANA PRODUCED FOSSIL HYDROCARBONS? (MEO)

ABSTRACT
THIS TWO PART STUDY WILL PROVIDE: 1. AN OVERVIEW OF OIL REFINING IN MONTANA, INCLUDING HISTORIC TRENDS IN OUTPUT, EMPLOYMENT, AND SOURCES OF CRUDE OIL AND CHARACTERISTICS OF THE OIL REFINING INDUSTRY; 2. PROJECTED IMPACT OF ALTERNATIVE SCENARIOS: PROJECTED DECLINES IN EMPLOYMENT AND EARNING FOR MONTANA AND BILLINGS AREA OF ALTERNATIVE SCENARIOS CONCERNING FUTURE DISTRIBUTION OF CRUDE OIL TO MONTANA REFINERIES. THE SCENARIOS WILL BE DEVELOPED BY THE MONTANA ENERGY ADVISORY COUNCIL. THIS RESEARCH IS ADMINISTERED BY THE MONTANA ENERGY ADVISORY COUNCIL WITH FEA FUNDS. (MEO)

ABSTRACT
THE RENEWABLE ALTERNATIVE ENERGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROGRAM WAS AUTHORIZED IN 1975 BY SENATE BILL 86. UNDER THE PROGRAM, ADMINISTERED BY THE ENERGY PLANNING DIVISION OF THE DEPARTMENT OF NATURAL RESOURCES AND CONSERVATION, GRANTS ARE AWARDED FOR NON-COMMERCIAL PROJECTS WHICH RESEARCH, DEVELOP, AND DEMONSTRATE THE USE OF RENEWABLE ENERGY SOURCES SUCH AS SOLAR, WIND, GEOTHERMAL, AND BIOMASS. ALL RESIDENT MONTANA INDIVIDUALS AND ORGANIZATIONS ARE ELIGIBLE TO APPLY FOR GRANTS. GRANTS MAY BE GIVEN FOR A PERIOD OF NO LONGER THAN ONE YEAR BUT MAY BE RENEWED. FUNDING FOR THE RENEWABLE ALTERNATIVE ENERGY PROGRAM IS DERIVED FROM 2 1/2% PER YEAR OF THE STATE COAL SEVERANCE TAX THROUGH 1979; THEREAFTER, THE AMOUNT AVAILABLE WILL BE 4% PER YEAR. (MEO)
REPORTS AND PUBLICATIONS
EACH PROJECT WILL RESULT IN A FINAL REPORT TO THE DEPARTMENT OF NATURAL RESOURCES AND CONSERVATION. THESE REPORTS WILL BE USED TO PRODUCE INFORMATION PAMPHLETS AND BROCHURES TO INFORM THE GENERAL PUBLIC ABOUT THE USE OF THE VARIOUS RENEWABLE ENERGY SYSTEMS AROUND MONTANA.

ABSTRACT
THE NEW WESTERN ENERGY SHOW WILL BRING THE WORKSHOP-PLUS-INFORMATION APPROACH TO A DOZEN COMMUNITIES AROUND MONTANA, SPENDING 2-4 DAYS IN EACH AREA. THEY WILL (1) DIRECT THE BUILDING OF A SOLAR WATER HEATER, AND LEAVE IT TO BE INSTALLED IN A LOCAL BUILDING; (2) DISPLAY OPERATIONAL RENEWABLE ENERGY EQUIPMENT (WIND GENERATORS, SOLAR PANELS, A METHANE DIGESTER, SMALL HYDRO SYSTEMS); (3) DISTRIBUTE RELEVANT BOOKS AND PAMPHLETS ON ENERGY USE AND CONSERVATION; (4) ILLUSTRATE GRAPHICALLY THE APPLICATIONS OF BIO-GAS TECHNOLOGY ON HOMESTEAD, FEEDLOT, MUNICIPAL SEWAGE AND OTHER LEVELS; (5) DEMONSTRATE SIMPLE, LOW-COST ENERGY-SAVING TECHNIQUES; (6) ENTERTAIN AND INFORM AUDIENCES WITH COUNTRY-FOLK-STYLE MUSIC AND THEATRICAL PRESENTATIONS--ALL WITH ENERGY-RELATED THEMES. BY BRINGING THE WORKSHOP/INFORMATION DISSEMINATION FORMAT PLUS A PROGRAM OF EDUCATIONAL/ENTERTAINING DRAMA TO RURAL TOWNS IN MONTANA, THEY EXPECT TO REACH A LARGE POPULATION WHICH WOULD OTHERWISE HAVE DIFFICULTY IN OBTAINING INFORMATION ON RENEWABLE ENERGY, AND THEY HOPE TO CATALYZE COMMUNITY EFFORTS TOWARD ENERGY CONSERVATION AND UTILIZATION OF RENEWABLE ENERGY SOURCES. ABSTRACT
THIS PROJECT WILL ASSEMBLE A LOW-COST DATA ACQUISITION SYSTEM AND USE IT TO MONITOR AND CONTROL ALL ENERGY-RELATED PARTS OF THE OPERATION OF AN EXISTING RESIDENCE. THIS WILL INCLUDE CONTINUOUS MONITORING AND RECORDING OF GAS AND ELECTRICITY, TEMPERATURE BOTH OUTSIDE AND AT VARIOUS INSIDE LOCATIONS, WIND AND SOLAR RADIATION. THE PROJECT WILL ALSO ATTEMPT TO REDUCE PEAK ENERGY DEMANDS BY CLOSING OFF PARTS OF THE HOUSE AND USING A WOOD BURNING STOVE OR OTHER SUPPLEMENTAL HEAT TO HELP CARRY PART OF THE LOAD. THIS PROGRAM WILL DEVELOP THE NECESSARY INSTRUMENTATION AND CONTROL TO MAKE COMPUTER CONTROL OF ENERGY USE ECONOMICAL EVEN IN RELATIVELY SMALL BUILDINGS. (MEO)

ABSTRACT
IT IS THE PURPOSE OF THIS PROJECT TO DEVELOP AND CONDUCT A SHORT COURSE FOR BUILDING CONTRACTORS AND OTHERS TO FAMILIARIZE THEM WITH THE THEORY OF ENERGY USAGE AND PRESENT CHANGES IN BUILDING DESIGN/CONSTRUCTION WHICH WOULD LEAD TO THE CONSTRUCTION OF MORE ENERGY-EFFICIENT BUILDINGS SUITED FOR USE WITH BOTH CONVENTIONAL AND ALTERNATE ENERGY SOURCES. THE COURSE WOULD BE TAUGHT BY MECHANICAL ENGINEERING FACULTY MEMBERS AT MONTANA STATE UNIVERSITY AS BOTH A NIGHT COURSE AT MONTANA STATE UNIVERSITY, AND A CORRESPONDENCE COURSE FOR PERSONS REMOVED FROM THE BOZEMAN AREA.

BEST DOCUMENT AVAILABLE

ONE COURSE WOULD HAVE THREE PRIMARY GOALS: 1. TO INTRODUCE BUILDERS TO THE ENGINEERING THEORY OF ENERGY, INCLUDING ITS GENERATION, USAGE, AND CONCEPTS OF EFFICIENCY; 2. TO ENCOURAGE A CRITICAL EVALUATION OF CURRENT BUILDING PRACTICES AS THEY AFFECT ENERGY USAGE; AND 3. TO INVESTIGATE THE POSSIBILITY FOR IMPROVING THE ENERGY EFFICIENCY OF BUILDINGS. (MEO)

ABSTRACT
THIS IS A PROJECT TO INSTALL, TEST AND EVALUATE THE EFFECTIVENESS AND ECONOMIC FEASIBILITY OF A SOLAR-ASSISTED HEAT PUMP SPACE HEATING SYSTEM, SOLAR-ASSISTED DOMESTIC HOT WATER HEATING SYSTEM, AN ENERGY-EFFICIENT FIREPLACE, AND AN ENERGY EFFICIENT STORAGE COOLING SYSTEM IN A SINGLE FAMILY RESIDENCE LOCATED IN THE NORTH HELENA VALLEY, MONTANA. THE MAIN OBJECTIVE OF THIS PROJECT IS TO DEMONSTRATE AND MAKE KNOWN THE FEASIBILITY OF USING SOLAR ENERGY IN THIS TYPE OF SYSTEM. SECONDARY TO THIS GOAL IS TO ADD TO THE DATA SOURCE THAT WILL PERMIT DESIGNERS AND CONTRACTORS TO INCORPORATE SOLAR AND ENERGY CONSERVING SYSTEMS INTO THEIR WORK. (NEO)

AND WATER HEATING FROM ALTERNATIVE ENERGY SOURCES. PRINCIPALLY BY MEANS OF: (1) EXTRAORDINARY INSULATION; (2) A HEAT PUMP, (3) TWO SOLAR FLAT PLATE COLLECTORS, AND (4) INTEGRAL DESIGN, CONTROL, AND OPERATION. AS A DEMONSTRATION PROJECT, THIS PROPOSAL IS CHIEFLY CONCERNED WITH ADVANCING THE PRACTICAL RATHER THAN THE TECHNOLOGICAL STATE OF THE ART VIS-A-VIS SOLAR POWER DEVELOPMENT FOR HOUSEHOLD USE. IT WILL DO SO BY DEMONSTRATING THAT: (A) THERE ARE ADEQUATE MEANS TO MEET HOME HEATING NEEDS FROM RENEWABLE ENERGY SOURCES; (B) THESE MEANS CAN READILY BE PURCHASED OR FABRICATED FROM AVAILABLE COMPONENTS; AND (C) THEY CAN BE INSTALLED AND OPERATED ECONOMICALLY AND WITH RELATIVE EASE. ABSTRACT
MUCH RESEARCH AND DEVELOPMENT HAS BEEN DONE IN CREATING THE VARIOUS COMPONENTS NECESSARY TO OBTAIN COMFORT HEATING FROM SOLAR ENERGY. IN CLIMATES AS BUTTE, MT MUCH HEATING AND LIMITED COOLING IS NECESSARY DURING THE YEAR. USING ALL THE COMPONENTS OF SOLAR ENERGY UTILIZATION TO OBTAIN COMFORT HEATING IS ADEQUATELY DONE ONLY WHEN THESE COMPONENTS ARE ECONOMICALLY INTEGRATED INTO A CONVENTIONAL FOSSIL-FUEL ENERGY HEATING SYSTEM. THE REASON BEING THAT IN THIS NORTHERN CLIMATE A SYSTEM THAT COULD RELY TOTALLY ON SOLAR ENERGY WOULD BE EXCESSIVELY LARGE AND COSTLY. THE PROPOSED SYSTEM WOULD ACHIEVE DIRECT AND INDIRECT UTILIZATION OF SOLAR ENERGY ALONG WITH A CONVENTIONAL WARM-AIR HEATING SYSTEM. IN ADDITION TO EVALUATION VARIOUS COMPONENTS OF A SOLAR ENERGY UTILIZATION SYSTEM, VARIOUS CONTROL ARRANGEMENTS AND SEQUENCING WOULD BE STUDIED. ONE END RESULT WOULD BE A COMPUTER PROGRAM DEVELOPED FROM DATA OF VARIOUS COMPONENTS TESTED AND SYSTEM OPERATIONAL DATA THAT WOULD ALLOW EASY VARIATION OF THE SYSTEM PARAMETERS TO OPTIMIZE THE SIZE OF THE VARIOUS SOLAR COMPONENTS. THE HEATING SYSTEM PLANNED WOULD USE A CIRCULATING WARM AIR SYSTEM, TRANSFERRING HEAT FROM THE THERMAL STORAGE TANK TO THE SUPPLY AIR BY A FINNED COIL IN THE AIR HANDLING UNIT. A SECOND FINNED COIL IN THE AIR HANDLING UNIT WOULD DRAW ENERGY FROM A FOSSIL FUELED WATER BOILER WHEN SUFFICIENT SOLAR ENERGY WAS NOT AVAILABLE. (MEO)

ABSTRACT
THIS PROGRAM WILL MEASURE SOLAR RADIATION AT 20 LOCATIONS IN MONTANA. THE MEASUREMENTS ARE INTENDED TO BROADEN THE SOLAR INSOLATION DATA BASE FOR MONTANA IN ORDER TO IMPLEMENT AND ACCELERATE THE UTILIZATION OF SOLAR ENERGY. THE MEASUREMENTS ARE ORIENTED TOWARD PROVIDING SPECIFIC DATA FOR COMPUTING THE ENERGY GAIN OF FLAT-PLACE COLLECTORS. THE MEASURING STATIONS WILL BE LOCATED AT SELECTED MONTANA HIGH SCHOOLS. SCIENCE TEACHERS AND STUDENTS WILL ASSIST IN THE OPERATION OF THE MEASURING EQUIPMENT. THE COST OF GETTING THIS ESSENTIAL DATA IS CONSEQUENTLY SMALL. IN ADDITION TO THE DATA, IMPORTANT EDUCATIONAL AND PROMOTIONAL BENEFITS WILL BE PROVIDED BY THIS PROGRAM. (MEO)

ABSTRACT
THIS EFFORT WILL INCLUDE RESEARCH, DEVELOPMENT, AND DEMONSTRATION OF A SOLAR COLLECTOR, HEAT STORAGE AND SPACE HEATER SYSTEM. SUCH A SYSTEM WILL BE DESIGNED SO THAT CONSTRUCTION OF HARDWARE MAY BE ACCOMPLISHED IN THE HOME SHOP AT AN ECONOMICAL PRICE. FURTHER, THE ENERGY INPUT FOR THE ORIGINAL MANUFACTURING OF HARDWARE COMPONENTS CAN BE JUSTIFIED ON THE ENERGY RETURNED FOR SPACE HEATING. INNOVATIVE CONTRIBUTIONS INCLUDE A HEAT-SINK MODIFICATION TO A FLAT-PLATE COLLECTOR, THE DEVELOPMENT OF A GLASS-LESS COLLECTOR, AND A COLLECTOR WITH A MODIFIED REFLECTOR. A MULTI-UNIT HEAT STORAGE SYSTEM AND A SOLAR TRACKING SENSOR ARE ALSO PROPOSED. THIS PROPOSAL IS TRIPHASIC: RESEARCH, APPLICATION, AND DEMONSTRATION. IN ADDITION TO THE FINISHED WORKING SOLAR SYSTEM, A MAJOR CONTRIBUTION WHICH THIS GRANT PROPOSAL OFFERS IS A PROFESSIONAL CALIBER LAYMAN'S HANDBOOK WHICH WILL BE CONCERNED NOT ONLY WITH HARDWARE AND CONSTRUCTION, BUT ALSO WITH APPLICABILITY AND AVAILABILITY OF MATERIALS AND COSTS IN THIS REGION. (MEO)

ABSTRACT
THIS IS A PROJECT TO CONSTRUCT AND INSTALL A HOT AIR SOLAR COLLECTOR SYSTEM IN A LIMITED NUMBER OF LOW-INCOME HOMES. THE CONTRACTING AGENCY WILL DEVELOP A PRACTICAL MODEL OF THE COLLECTOR SYSTEM AND WILL DEMONSTRATE THE APPLICATION IN TEN RESIDENCES. THE KEY COMPONENT IN THIS SYSTEM IS A SOLAR COLLECTOR FROM A NASA DESIGN. (PANELS CAN BE PRODUCED FOR LESS THAN A $1.00 PER SQ.FT., AND EACH SQ. FT. CAN PROVIDE NEARLY 100,000 BTU'S DURING A HEATING SYSTEM IN MONTANA). THE COUNCIL INTENDS TO DEMONSTRATE THAT SUCH A SYSTEM CAN PROVIDE AT LEAST 40% OF A HOME'S HEAT REQUIREMENT AT A COST COMPARABLE WITH CURRENTLY POPULAR SUPPLEMENTAL HEATING SYSTEM. (MEO)

ABSTRACT
THE PROJECT PROPOSES TO BUILD AND DEMONSTRATE A SOLAR HEATING SYSTEM WHICH HAS BEEN EMPLOYED IN OTHER AREAS OF THE U.S. THIS WILL BE DONE BY CONSTRUCTING A UNIT UTILIZING BEER CANS FOR THE COLLECTOR SURFACE WITH WOOD FRAMING AND A VINYL OR FIBERGLASS COVERING. ACCORDING TO SOME DATA THIS TYPE OF COLLECTOR HAS PRODUCED AS MUCH HEAT AS THE MOST EXPENSIVE ON THE MARKET.

BEST DOCUMENT AVAILABLE

IF THE PROJECT IS SUCCESSFUL IT IS EXPECTED THAT A LAYMAN COULD BUILD A SOLAR COLLECTOR THAT WOULD PROVIDE 30% OF HIS HEAT FOR A HOME FOR $1,500-1,600. AS BETTER STORAGE FACILITIES ARE DEVELOPED, THIS PROJECT COULD MEET 30%-50% OF THE HOMEOWNER'S HEATING NEEDS. THIS PROJECT IS EXTREMELY COMPATIBLE WITH THE ENVIRONMENT AND USES A RESOURCE, BEER CANS, THAT ARE NOW A SOLID WASTE PROBLEM IN MONTANA. (MEO)

ABSTRACT
THIS WILL BE A DEMONSTRATION PROJECT FOR A LOW-COST, HOME-MADE SOLAR HEATING SYSTEM WHICH WILL INCORPORATE A HEAT PUMP. THE MAJOR OBJECTIVES WILL BE TO: (1) PROVE THAT A SOLAR SYSTEM CAN BE BUILT BY MANY INDIVIDUALS THAT WILL DO THE REQUIRED JOB FOR LESS THAN THE $10-$20 PER SQ. FT. OF THE COMMERCIAL PATENTED COLLECTOR SYSTEMS; (2) KNOW HOW LONG A LARGE VOLUME OF HEAT CAN BE STORED BY SUCH A STORAGE TANK. FIGURING A TEMPERATURE RANGE OF FROM 75 DEGREES F TO 160 DEGREES F THIS TANK AND CONCRETE AND ROCK COULD RETAIN APPROXIMATELY 5,500,000 BTU OF HEAT. THIS SYSTEM IS INTENDED TO CUT USE OF NATURAL GAS 75% THIS YEAR AND COMPLETELY NEXT YEAR. (MEO)

ABSTRACT
THIS PROPOSAL IS DEALING WITH SOLAR ENERGY AS AN ACTIVE HEATING SOURCE TO BE USED IN CONJUNCTION WITH AN ELECTRIC HEAT PUMP USING OUTDOOR AIR AS A HEAT SOURCE AND HEAT SINK WITH AIR AS A DISTRIBUTION FLUID. THE PROJECT WILL USE SOLAR ENERGY AS A SOURCE FOR PREHEATING AIR ENTERING THE CONDENSOR SIDE OF THE HEAT PUMP. THIS PREHEATING IS DONE IN ORDER TO MAINTAIN THE HEAT PUMP'S EFFICIENCY WHEN EXTERIOR TEMPERATURES DROP BELOW 20 DEGREES F, OR AT THOSE TIMES WHEN THE EFFICIENCY OF THE HEAT-PUMP FALLS. (MEO)

ABSTRACT
THE PROJECT WILL COMBINE SOLAR FLAT PLATE COLLECTORS, INCREASED INSULATION, A HEAT PUMP AND WATER HEAT STORAGE SYSTEM FITTED TO AN EXISTING FARM HOME. THE MAJOR OBJECTIVES OF THIS PROJECT ARE TO: KEEP COST FACTORS TO A MINIMUM AND YET PRODUCE A SYSTEM THAT WILL BE AS EFFICIENT, MAINTENANCE FREE, AND AUTOMATIC AS POSSIBLE; AROUSE INTEREST AMONG FRIENDS AND NEIGHBORS IN NO. MONTANA SO THAT THEY WILL GAIN THE NECESSARY CONFIDENCE TO BUILD A SYSTEM OF THEIR OWN; TO CUT NATURAL GAS HEATING BILL BY 65% IN EACH BUILDING. (MEO)

ABSTRACT
PROJECT GOALS: (1) TO RETROFIT AN EXISTING SINGLE FAMILY HOME WITH A SIMPLE COMMERCIALLY AVAILABLE SOLAR HEATING SYSTEM; (2) TO DEMONSTRATE TO THE PUBLIC THAT SOLAR HEATING CAN SIGNIFICANTLY CURTAIL USAGE OF NON-RENEWABLE FUELS FOR HEATING, AND SAVE THE HOMEOWNER MONEY, EVEN THOUGH THE HOME WAS NOT ORIGINALLY DESIGNED WITH ENERGY CONSERVATION IN MIND; (3) TO DEMONSTRATE THAT THE AVERAGE HANDYMAN IS CAPABLE OF INSTALLING MOST, IF NOT ALL, OF A SOLAR HEATING SYSTEM. LOCATION
MT - PONDERA CO., CONRAD
ABSTRACT
THIS IS A SOLAR HEATING PROJECT DESIGNED TO DEMONSTRATE THE FEASIBILITY AND PRACTICALITY OF UTILIZING SOLAR ENERGY FOR A PRE-EXISTING SINGLE-FAMILY RESIDENCE IN NORTH CENTRAL MONTANA AT APPROXIMATELY 48 DEGREES NORTH LATITUDE. AS DESIGNED, THE PROJECT HAS TAKEN INTO CONSIDERATION MONTANA'S ENVIRONMENT (INCLUDING HAIL, WINTER SNOW, AND COOLING WINDS), AESTHETIC DEMANDS, AND CONSTRUCTION LIMITATIONS INHERENT IN ADAPTING PRE-EXISTING STRUCTURES TO AN ALTERNATIVE ENERGY SYSTEM. THE SOLAR PROJECT CAN BE DIVIDED INTO THREE SEPARATE, BUT INTEGRATED SYSTEMS. THE FIRST IS THE SOLAR HEAT COLLECTION SYSTEM CONSISTING OF A WATER-ETHYLENE GLYCOL SOLUTION CIRCULATING FROM A SOLAR COLLECTOR UNIT THROUGH COPPER TUBING COILED AROUND WATER STORAGE TANKS, THROUGH AN EXPANSION TANK, AND THEN BACK TO THE SOLAR COLLECTOR. THE SECOND SYSTEM, THE HEAT STORAGE AND HOUSE HEATING SYSTEM, INCLUDES EIGHT 120-GALLON STORAGE TANKS, ON 82-GALLON ELECTRIC WATER HEATER, AND HOT WATER RADIATORS IN THE LIVING QUARTERS. THE THIRD SYSTEM TAKES ADVANTAGE OF THE HOT WATER ETHYLENE GLYCOL SOLUTION THAT HAS PASSED THROUGH THE SOLAR COLLECTOR TO PREHEAT THE WATER FOR A CONVENTIONAL HOT WATER HEATER WHICH IS ALREADY IN OPERATION IN THE HOUSE. (MEO)

ABSTRACT
THIS SOLAR HOME HEATING SYSTEM IS PARTIALLY MODULAR IN DESIGN, THUS ALLOWING FOR OPTIMIZATION OF THE PERFORMANCE OF THE SYSTEM BY THE ADDITION OR DELETION OF COMPONENT MODULES. DUE TO THE SIMPLE DESIGN, UPGRADING THE SYSTEM IS EASILY DONE AS NEW DEVELOPMENTS IN THE FIELD OF SOLAR ENERGY BECOME ECONOMICALLY FEASIBLE. THE SYSTEM AS ORIGINALLY DESIGNED IS NOT OPTIMALLY EFFICIENT, BUT RATHER, COST EFFECTIVENESS AND PRACTICABILITY TAKE PRECEDENCE OVER EFFICIENCY. FURTHERMORE, THE SYSTEM HAS A BROAD RANGE OF APPLICATIONS AND CAN BE RETROFITTED TO NEARLY ANY DWELLING THAT HAS AN EXISTING CONVENTIONAL HEATING SYSTEM. (NEO)

ABSTRACT
THIS PROJECT IS A DEMONSTRATION IN THE APPLICATION OF SOLAR ENERGY TO HEATING A HOUSE, BY RETROFITTING INTO AN EXISTING HYDRONIC SYSTEM. IN ADDITION, DURING THE SUMMER MONTHS, IT WOULD PROVIDE DOMESTIC HOT WATER. APPROXIMATELY 300 SQUARE FEET OF FLAT PLATE SOLAR COLLECTORS WILL BE INSTALLED, PRODUCING HEAT TO BE STORED IN A 1500 GALLON HEAT STORAGE TANK, PART OF THE EXISTING SYSTEM. THE SOLAR SYSTEM WOULD TRANSFER HEAT, THROUGH A HEAT EXCHANGER, TO THE HEAT STORAGE TANK. THE SOLAR HEAT ALONE SHOULD BE ADEQUATE DURING ALL BUT ABOUT 100 DAYS, WHILE DURING THAT PERIOD IT WOULD REDUCE THE AMOUNT OF FUEL NEEDED FOR THE WOOD FURNACE. (NEO)

ABSTRACT
THIS PROJECT IS A COMBINATION OF ACTIVE AIR COLLECTION AND PASSIVE COLLECTION IN A SINGLE FAMILY RESIDENCE. THE HOUSE IS RECESSED APPROXIMATELY 2 FEET IN THE GROUND TO KEEP IT LOW AND GAIN SOME INSULATION FROM THE EARTH. AN INTERIOR MASONRY WALL SERVES AS PASSIVE HEAT STORAGE AND ALSO AS A HEAT SINK TO BALANCE DAYTIME WARMING AND NIGHT COOLING.
CONSTRUCTION OF THE SOLAR COLLECTION IS PLANNED AS A WOODEN, CARPENTER-BUILT UNIT. IT IS INTENDED TO USE CONVENTIONAL READILY AVAILABLE EQUIPMENT SUCH AS AN ELECTRIC FURNACE TO DRIVE THE SYSTEM.
THE GOAL IS TO BUILD AN EFFICIENT, ECONOMICAL SOLAR HOUSE THAT WILL ALSO BE INTERESTING AND ATTRACTIVE MEET THE NEEDS OF A TYPICAL FAMILY OF FOUR, AND SPEED PUBLIC ACCEPTANCE OF SOLAR HEATING. (NEO)

ABSTRACT
THIS PROJECT IS TO CONSTRUCT AND INSTALL A RETROFIT SOLAR HEATED HOT AIR SYSTEM FOR OWNERS PRIMARILY OF MOBILE HOMES. A ROCK AND GRAVEL HEAT STORAGE BIN WILL BE LOCATED UNDER THE HOUSE IN A POSITION TO FEED INTO THE EXISTING BLOWER AND DUCTED HEATING SYSTEM. THE PERFORMANCE OF THIS SYSTEM WILL BE EVALUATED BY A THREE POINT RECORDING THERMOGRAPH. THE PLANNED PROJECT WILL BE SUCH THAT IT CAN ACCOMODATE A METHANE FURNACE AND A SMALL LEAN-TO GREENHOUSE AT A FUTURE DATE. THE CONSTRUCTION OF THIS SYSTEM WILL UTILIZE NO SPECIAL MATERIALS OR TECHNOLOGY UNAVAILABLE TO THE LAYMAN. (MEO)

ABSTRACT
THIS PROJECT WILL SUPPLEMENT THE EFFORTS OF A FAMILY OF FIVE TO UTILIZE ENERGY FROM WOOD AND THE SUN TO PROVIDE CLOSE TO 100% OF THE HEAT ENERGY REQUIREMENTS FOR HEATING A RESIDENCE INCLUDING 2,600 SQUARE FEET OF LIVING SPACE, 720 SQUARE FEET OF SHOP AREA AND 336 SQUARE FEET OF INDOOR GARDEN AREA. ALSO TO PROVIDE 70% OF THEIR DOMESTIC HOT WATER. AN ESTIMATED 50% OF THE EQUIPMENT AND MATERIAL HAS BEEN PUT IN PLACE BY THE OWNER-BUILDER. THIS INLCUDES FOUR WOOD BURNING STATIONS, HEATING COILS, BASEBOARD HEATERS, 2000 GALLON STORAGE TANK, HOT WATER HEATER AND GREENHOUSE. ALSO THE RESIDENCE HAS A COMPLETE ELECTRIC HEATING SYSTEM FOR BACKUP PURPOSES. THE FUNDS FROM THIS PROPOSAL WILL INSTALL THE SOLAR FURNACES. ONE WILL HEAT AIR AND USE A ROCK BATTERY FOR STORAGE. THE OTHER WILL HEAT WATER AND USE THE 2000 GALLON TANK FOR STORAGE. (MEO)

ABSTRACT
THIS PROJECT PROPOSES TO DO TWO SEPARATE DEMONSTRATION SYSTEMS, ONE WHICH WILL AUGMENT THE COMMERCIAL ENERGY SOURCE USED AT THE CAMP, AND ONE WHICH WILL REPLACE IT ALTOGETHER. FLAT-PLATE COLLECTORS FOR WATER HEATING IN THE LODGE/DINING HALL/DORMITORY WILL RAISE THE WATER TEMPERATURE BETWEEN ITS SOURCE AND THE ELECTRIC WATER HEATER, THE OBJECT BEING TO REDUCE THE AMOUNT OF ELECTRICAL POWER CONSUMED. A SIMPLE SOLAR SHOWER WILL ALSO BE CONSTRUCTED, NOT ONLY TO REDUCE CONSUMPTION OF CONVENTIONALLY HEATED WATER, BUT TO CONVEY IN VERY CONCRETE FASHION THE LESSONS OF INDEPENDENCE (FROM CONVENTIONAL ENERGY) AND DEPENDENCE (UPON CLIMATIC, WEATHER, AND OTHER ENVIRONMENTAL CONDITIONS). (MEO)

ABSTRACT
THIS PROJECT WILL INSTALL SOLAR HEATING SYSTEMS ON MOBILE HOMES WHICH UTILIZE AN EFFECTIVE PLATE COLLECTOR BANK WHICH MOUNTS IN A VERTICAL POSITION TO THE SOUTH WALL OF THE TRAILER. DISTRICT 11 WILL INSTALL 20 OF THESE UNITS AT A COST OF $600 PER UNIT ON MOBILE HOMES OF LOW INCOME FAMILIES.
UNFORTUNATELY, MOST MOBILE HOMES ARE POORLY INSULATED AND REQUIRE SUBSTANTIALLY MORE ENERGY TO HEAT PER CUBIC FOOT THAN CONVENTIONALLY CONSTRUCTED HOMES. ALTHOUGH WEATHERIZATION PROVIDES SOME ENERGY SAVINGS FOR MOBILE HOME OWNERS, THIS TYPE OF HOUSING CONTINUES TO BE THE MOST COSTLY FROM AN ENERGY STANDPOINT. BECAUSE MOBILE HOMES ARE SUBJECT TO PERIODIC RELOCATION, THE STAFF OF DISTRICT 11 HAS DESIGNED A MODULAR SOLAR HEATING SYSTEM WHICH CAN BE EASILY DISMANTLED. (MEO)

ABSTRACT
THIS PROJECT WILL DEMONSTRATE THE APPLICATION OF SOLAR ENERGY TO DOMESTIC WATER HEATING IN AN EXISTING 84 UNIT, LOW INCOME APARTMENT DWELLING. THE PROJECT WILL CONSIST OF A RETROFIT OF THE DOMESTIC WATER SYSTEM TO DEVELOP A METHODOLOGY OF APPLYING SOLAR ENERGY TO EXISTING BUILDINGS. HORIZON HOUSE IS A FIVE-STORY BUILDING WITH ROOF STRUCTURE TO ACCOMODATE EQUIPMENT. ITS LOCATION IS SUCH THAT THE UNITS WOULD HAVE 100% SUN EXPOSURE. THE PROPOSED SYSTEM WILL SUPPLY 85% OF THE PRESENT DOMESTIC WATER FOSSIL FUEL CONSUMPTION. LOAD FACTORS FOR SOLAR WATER HEATING SYSTEMS ARE HIGH BECAUSE OF THE RELATIVELY CONSTANT DEMAND FOR HOT WATER. THUS, SOLAR WATER HEATING IS AN ATTRACTIVE USE OF SOLAR ENERGY. (MEO)

ABSTRACT
THIS PROJECT IS FOR A SOLAR HEATED GREENHOUSE FOR WINTER OPERATION IN MONTANA. THIS PROJECT WILL DEMONSTRATE THAT COMMERCIAL GREENHOUSES CAN BE CONSTRUCTED WHICH WILL MAINTAIN ADEQUATE GROWING TEMPERATURES WITH NEGLIGIBLE NON-RENEWABLE ENERGY CONSUMPTION. WE WILL SIMULTANEOUSLY DETERMINE WHETHER THE INCREASED LIGHT INTENSITIES DUE TO THE REFLECTORS WILL MAKE UP FOR THE SHORT DAYLIGHT PERIODS AND ALLOW THE GROWTH OF VEGETABLES THAT WOULD BE MARGINAL WITH NORMAL WINTER LIGHT LEVELS. ALTHOUGH THE GREENHOUSE IS DESIGNED FOR WINTER USE, SUMMER USE IS NOT UNREASONABLE AND WILL BE DEMONSTRATED ALSO. (MEO)

ABSTRACT
THE PROJECT WILL RESEARCH, DEVELOP AND DEMONSTRATE A CONCENTRATING HOT-AIR SOLAR COLLECTOR SYSTEM. THE CONCENTRATING MECHANISM WILL BE A PARABOLIC OR CIRCULAR REFLECTIVE SURFACE WHICH WILL REFLECT THE SUN RAYS ONTO THE HEAT ABSORBING SURFACE.
IT IS ANTICIPATED THAT THE USE OF AIR INSTEAD OF WATER AS A TRANSFER MEDIUM WILL: 1. ELIMINATE THE POSSIBILITIES OF CLOGGING, FREEZING, AND CORROSION; 2. ELIMINATE THE NEED TO USE MORE EXPENSIVE MATERIALS ASSOCIATED WITH A WATER SYSTEM, E.G., WATER STORAGE TANK, ANTIFREEZE; 3. AND DECREASE THE AMOUNT OF MAINTENANCE NORMALLY REQUIRED OF A WATER SYSTEM. (MEO)

STUDY AFFILIATION
PART OF THE MONTANA RENEWABLE ALTERNATIVE ENERGY PROGRAM (SB 86).

ABSTRACT
THE PROJECT IS A REPEATER COMMUNICATION TYPE SYSTEM WHICH WILL BE ONE OF THE FIRST SOLAR PHOTOVOLTAIC POWERED AMATEUR RADIO REPEATERS IN THE COUNTRY. CIRCUITS FOR DATA COLLECTION BY REMOTE CONTROL, THE TOTAL POWER SYSTEM OF BATTERIES AND THE SOLAR PANELS, REPEATER INSTALLATION AND SITE DEVELOPMENT FIT UNDER THE CATEGORY OF DEVELOPMENT. THE REPEATER WILL BE AN 'OPEN' REPEATER. ANY AMATEUR OPERATOR HAVING THE PROPER CHANNELS WILL BE ABLE TO USE THE REPEATER. DATA SENSORS WILL SEND BACK PERIODIC DATA ON THE SYSTEM TO MONITOR SYSTEM FUNCTIONS. SINCE THE REPEATER IS INTENDED TO LAST INDEFINITELY, MUCH DATA ON MOUNTAIN TOP SOLAR AND WEATHER CONDITIONS MAY BE TAKEN FOR FUTURE REFERENCE IN INSTALLATIONS OF THIS TYPE BY COMMERCIAL OR GOVERNMENTAL AGENCIES. ABSTRACT
THIS PROJECT WILL: 1. INSTALL A HEAT PUMP SYSTEM USING ARTESIAN WATER AS THE HEAT SOURCE; 2. ERECT A YEAR-ROUND GREENHOUSE USING THE ARTESIAN WATER IN CONJUNCTION WITH SOLAR ENERGY. WITH THE USE OF THE ARTESIAN WELL WATER AS THE SOURCE OF HEAT AND AIR AS THE HEAT TRANSFER MEDIUM, THIS HEATING-COOLING SYSTEM WILL RUN YEAR-ROUND. THE LARGE QUANTITY OF WATER AVAILABLE FROM THE WELL AND ITS DISPOSAL AFTER PASSAGE THROUGH THE HEAT PUMP SYSTEM TO EXISTING FISH PONDS MAKES THIS PROJECT ECONOMICALLY AND PHYSICALLY PRACTICAL. (NEO)

ABSTRACT
THE BILLINGS SHIPPING CORPORATION SOLAR HEATING PROJECT IS ONE OF 80 SUCH PROJECTS FUNDED BY THE ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION TO HELP DEMONSTRATE HOW SOLAR ENERGY CAN HEAT AND COOL COMMERCIAL BUILDINGS. THIS SOLAR ENERGY SYSTEM WILL BE USED ON A NEW OFFICE BUILDING WHICH WILL BE PART OF A FREIGHT DISTRIBUTION FACILITY. THE TOTAL PROJECT INVOLVES 46,976 SQUARE FEET OF NEW CONSTRUCTION OF WHICH 4,900 SQUARE FEET IS THE OFFICE PORTION. WATER TO WATER FLAT PLATE SOLAR COLLECTORS WILL BE USED TO PROVIDE SPACE HEATING FOR AN OFFICE BUILDING. THE COLLECTORS WILL FURNISH HEATED WATER TO AN AIR HANDLING UNIT IF THE OCCUPIED SPACE IS REQUIRING HEATING OR TO A WATER STORAGE TANK IF THE SPACE TEMPERATURE IS SATISFIED. AN OUTDOOR HEAT REJECTION UNIT WILL BE USED TO PREVENT THE WATER-ANTI-FREEZE SOLUTION CIRCULATED THRU THE COLLECTORS FROM EXCEEDING 200 DEGREES F. HEAT FROM THE STORAGE TANK WILL BE USED WHEN THE COLLECTORS ARE NOT OPERATING. (MED)

ABSTRACT
THE BASIC OBJECTIVE OF THE WESTERN REGIONAL PLANNING EFFORT HAS BEEN TO DEFINE PROGRAMS FOR THE STIMULATION OF BROADER AND EARLIER USE OF SOLAR ENERGY. EMPHASIS IS ON THE NEEDS OF END-USE CONSUMERS OF SOLAR ENERGY. THE APPROACH HAS BEEN TO DISTRIBUTE THE WORK LOAD TO THE STATES. THE SOLAR PLANNING OFFICE-WEST (SPOW) HAS ISSUED GRANTS TO THE INDIVIDUAL STATES TO: 1. IDENTIFY THE SOLAR ENERGY RESOURCES, CAPABILITIES AND NEEDS AND GIVE THE STATUS OF SOLAR ENERGY ACTIVITIES WITHIN THE STATE; 2. DETERMINE AN INITIAL SET OF STATE PRIORITIES, TOGETHER WITH SUPPORTING RATIONALE, FOR ACTIVITIES TO ENCOURAGE SOLAR ENERGY APPLICATIONS; 3. IDENTIFY AND DISCUSS THE EXISTING AND ANTICIPATED DETERRENTS TO AND DESIRABLE INCENTIVES FOR EXPANDING THE USE OF SOLAR ENERGY; AND 4. RECOMMEND PROGRAMS, TOGETHER WITH RATIONALES, COST, SCHEDULES, AND EXPECTED RESULTS, TO REDUCE OR ELIMINATE DETERRENTS AND TO IMPLEMENT INCENTIVES. THE SOLAR PLANNING OFFICE-WEST WILL THEN SYNTHESIZE THE INFORMATION PROVIDED BY THE STATES AND THEREBY DEVELOP A PLAN WITH PROJECTS AND PROPOSALS DESIGNED TO ACCELERATE THE DEVELOPMENT OF SOLAR ENERGY IN THE WEST.
REPORTS AND PUBLICATIONS

ABSTRACT
GOAL: TO DETERMINE THE MANNER IN WHICH MONTANA AND THE OTHER STATES OF THE WESTERN REGION CAN MOST EFFECTIVELY FOSTER IMMEDIATE AND RAPID DEVELOPMENT OF RENEWABLE ENERGIES (WIND, SOLAR, WATER, ETC.).
OBJECTIVE: IDENTIFY AND INTEGRATE VARIOUS ENTITIES THAT ARE OR SHOULD BE INVOLVED WITH SOLAR ENERGY DEVELOPMENT INTO A VIABLE SOLAR INFRASTRUCTURE WITHIN MONTANA THAT CAN IMPLEMENT PROGRAMS OR ELEMENTS OF PROGRAMS, FORMULATED AND RECOMMENDED BY THE MONTANA SOLAR PLANNING EFFORT, WHICH IN TURN WILL REALIZE CERTAIN LEVELS OF SOLAR DEVELOPMENT IN MONTANA AND THE STATES OF THE WESTERN REGION BY THE YEAR 1983.
WORK PLAN: A. SOLAR RESOURCE INVENTORIES: INVENTORIES OF SOLAR RESOURCES WILL BE COLLECTED FOR MONTANA. B. PROBLEM IDENTIFICATION: PROBLEMS THAT WOULD IMPEDE DEVELOPMENT OF A VIABLE SOLAR INDUSTRY AND MARKET IN MONTANA WILL BE IDENTIFIED BY QUESTIONNAIRES, MINI-ENERGY HEARINGS, SPECIALIZED WORKSHOPS, AND A THOROUGH LITERATURE SEARCH. C. PROBLEM ANALYSIS: ALL INFORMATION FROM A AND B ABOVE WILL BE ANALYZED AND FORMULATED INTO PROBLEM STATEMENTS. D. PROGRAM RECOMMENDATION: PROGRAMS RECOMMENDED TO HASTEN SOLAR DEVELOPMENT WITHIN THE WESTERN REGION, SUBREGIONAL AREAS AND MONTANA WILL INCLUDE AN IMPLEMENTATION SCHEME FOR THE ENTIRE WESTERN REGION THAT CAN NOT ONLY CARRY OUT PROGRAMS RECOMMENDED, BUT WILL ALLOW ACCESS TO THE SOLAR INFRASTRUCTURES FOUND IN EACH STATE. E. REPORTING: THE RESULTS OF THE SOLAR PLANNING EFFORT WILL BE PUBLISHED IN A REPORT TO THE SOLAR PLANNING OFFICE-WEST. A SOLAR DIRECTORY WILL ALSO BE PUBLISHED. (MEC)

ABSTRACT
THIS PROJECT IS CONCERNED WITH ELECTRICAL GENERATORS AND ALTERNATORS USED WITH SMALL WIND SYSTEMS. AND CONVERSION OF THEIR OUTPUT TO 60 HZ AC WHICH CAN BE FED INTO EXISTING POWER GRIDS. THE MAJOR TASK OF THIS PROJECT WILL BE CONTINUED DEVELOPMENT AND TESTING OF THE SYNCHRONOUS INVERTER ON WHICH WE HAVE BEGUN WORK. THIS DEVICE IS BASED ON AN SCR (SILICON CONTROLLED RECTIFIER) BRIDGE. AN ELECTRONIC CONTROL OF THE SCR FIRING ANGLE WILL BE DEVISED WHICH WILL ADJUST THE LOAD PRESENTED BY THE INVERTER TO THE GENERATOR. IN ORDER TO CONTROL THE WIND MOTOR RPM SO AS TO OBTAIN NEARLY MAXIMUM POSSIBLE POWER OUTPUT AT ALL WIND SPEEDS. AN ESTIMATE WILL BE MADE OF THE COST OF THE INVERTER IN QUANTITY PRODUCTION. A MOSTLY COMPLETED WIND GENERATION SYSTEM WILL BE FINISHED. AND WILL BE USED IN FIELD TESTS OF THE INVERTER. (MEO)

ABSTRACT
PHASE I OF THE WIND ENERGY DEMONSTRATION PROJECT WILL CONSIST OF A METEOROLOGICAL CONFIRMATION OF THE MAGNITUDE OF THE WIND RESOURCE AT THE PROPOSED SITE. (PHASE II WHICH MAY BE FUNDED AT A LATER DATE. WOULD CONSIST OF THE ACTUAL PROCUREMENT OF EQUIPMENT. INSTALLATION AND MONITORING OF PERFORMANCE.) PHASE I WILL CONSIST OF THE FOLLOWING STEPS: (1) THE SELECTED HILLTOP WILL BE INSTRUMENTED IN ORDER TO POSITIVELY ESTABLISH THE MAGNITUDE OF THE WIND ENERGY RESOURCE; (2) FOLLOWING A MINIMUM MEASURING PERIOD OF ONE MONTH. A DECISION REGARDING THE FUTURE COURSE OF THE PROJECT WILL BE MADE: (A) EITHER END PROJECT BECAUSE OF INSUFFICIENT WIND ENERGY; (B) CONTINUE THE METEOROLOGICAL MEASUREMENTS IF 1 MONTH MEASURING PERIOD IS CONSIDERED INSUFFICIENT TO ESTABLISH A RELIABLE CORRELATION WITH WEATHER BUREAU DATA; (C) CONTINUE PROJECT IF RECORDED DATA AND CORRELATION WITH LONG-TERM DATA INDICATE SITE IS SUFFICIENTLY WINDY; (3) CARRY OUT AN ANALYTICAL ESTIMATION OF THE WIND PLANT ENERGY PRODUCTION. ABSTRACT
THIS PROJECT WILL DESIGN A PADDLEWHEEL WITH A DEFLECTOR ON THE LOWER HALF TO PREVENT THE WIND FROM HITTING THE BALLON--WHICH IS MOVING INTO THE WIND. WIND TUNNEL EXPERIMENTS WILL BE CONDUCTED TO DETERMINE THE MOST ECONOMICAL POSITION AND SIZE OF THE DEFLECTOR, NUMBER OF BLADES, AND SHAPE OF THE BLADES.
THE MODEL IS SCALED UP AND 1' X 20' WINDMILL WILL BE CONSTRUCTED. THE PURPOSE OF THIS EXPERIMENT IS TO DESIGN A WINDMILL WITH A SLOW TIP SPEED, THAT DOESN'T NEED TO BE FEATHERED, THAT CAN BE MADE FAIRLY LARGE WITHOUT SPECIAL EQUIPMENT, AND CAN BE MADE OF JUNK MATERIAL, AND BE ECONOMICAL.
UNLIKE THE FAN BLADE WIND GENERATOR, THE PADDLEWHEEL TURNS WITH THE WIND. FOR THIS REASON IT CAN'T TURN MUCH FASTER THAN THE SPEED OF THE WIND EVEN WHEN FREE WHEELING. OTHER WINDMILLS TURN AT RIGHT ANGLES TO THE WIND. WHEN THEY HAVE A SMALL LOAD THEY CONTINUE TO ACCELERATE TILL SELF-DESTRUCTION--THEREFORE, THEY NEED TO BE FEATHERED. A SLOWER BLADE ALLOWS THE USE OF HEAVIER MATERIALS, SUCH AS STEEL. THIS DESIGN SHOULD BE ESPECIALLY USEFUL TO MONTANA FARMERS AND RANCHERS. IT CAN BE BUILT WITH NO OUTSIDE HELP AND MOST OF THE MATERIALS USED CAN BE FOUND AT LOW COST. (MEO)

ABSTRACT
THIS PROJECT WILL CONTINUE THE DEVELOPMENT OF WIND GENERATION SYSTEMS WHICH WILL BE INTEGRATED INTO THE EXISTING ELECTRICAL POWER GRID. DEVELOPMENT OF SYNCHRONOUS INVERTERS, WHICH CHANGE DIRECT CURRENT FROM WIND GENERATORS INTO ALTERNATING CURRENT SYNCHRONIZED WITH THE LINE FREQUENCY, WILL BE CONTINUED. TWO TYPES OF

BEST DOCUMENT AVAILABLE

BEST DOCUMENT AVAILABLE

SYNCHRONOUS INVERTER SYSTEMS WILL BE STUDIED. BASED ON SILICON-CONTROLLED RECTIFIERS (SCRS) AND TRANSISTORS RESPECTIVELY. THE GOALS WILL BE TO IMPROVE EFFICIENCY AND CURRENT WAVEFORM. TO DESIGN THE INVERTERS TO PRESENT THE PROPER LOAD TO THE GENERATOR FOR VARIOUS WIND SPEEDS, AND TO REDUCE COST. THREE TYPES OF DUCTED WINDMILL SYSTEMS, CONSISTING OF FIXED BARRIERS ARRANGED TO INCREASE AIR VELOCITY TO THE ROTORS, WILL BE DEVELOPED AND TESTED. THESE SYSTEMS WILL BE DESIGNED TO BE APPLICABLE TO WINDMILL SHELTERBELTS AS WELL AS TO INDIVIDUAL USE. THE SYNCHRONOUS INVERTERS WOULD ALSO BE APPLICABLE TO SOLAR OR SMALL HYDRO-ELECTRIC DIRECT CURRENT GENERATING SYSTEMS. (MEO)

ABSTRACT
THIS PROJECT WILL DEMONSTRATE THE OPERATION OF A WIND-POWERED ELECTRIC GENERATING SYSTEM WHICH WORKS IN CONJUNCTION WITH THE EXISTING POWER GRID. THIS SYSTEM CONFIGURATION DISPLAYS SEVERAL MARKED ADVANTAGES OVER TRADITIONAL ELECTRIC ENERGY STORAGE IN BATTERIES. SINCE THE NETWORK PROVIDES BACK-UP ENERGY, NO STORAGE IS REQUIRED. THE HEAVY INVESTMENT OF MONEY, MATERIALS AND ENERGY IN BATTERIES IS NOT NECESSARY AND THE NET ENERGY GAIN OF THE SYSTEM IS IMPROVED. NO CHANGE IN HOUSE WIRING IS REQUIRED. THIS SYSTEM MAKES USE OF THE POWER DISTRIBUTION NETWORK THE FEDERAL GOVERNMENT HAS ALREADY SUBSIDIZED. ALL OF THE WIND-GENERATED ENERGY IS USED EITHER IN THE HOUSE OR SOMEWHERE ELSE IN THE NETWORK. THUS, ANOTHER ELECTRIC PRODUCING FUEL, SUCH AS COAL OR WATER, IS REPLACED BY RENEWABLE WIND ENERGY. (MEO)

ABSTRACT
THE LARGEST LAND AREA IN THE U.S. WITH HIGH WIND ENERGY (ENERGY LEVELS IN EXCESS OF 150 WATTS PER SQUARE METER) IS IN THE GREAT PLAINS, AND THE STATES WHICH COMPRISE THE OLD WEST REGIONAL COMMISSION DOMINATE THIS AREA. AREAS OF WIND POWER LEVELS IN EXCESS OF 200 WATTS PER SQUARE METER EXIST OVER LARGE PORTIONS OF THE OWRC. THE OBJECTIVES OF THE STUDY ARE TO: 1. DETERMINE THE FEASIBILITY OF USING WIND POWER FOR ELECTRICAL POWER GENERATION IN AGRICULTURAL AND RURAL AREAS WHERE THE WIND RESOURCE IS SUBSTANTIAL; 2. DEVELOP CAPABILITY TO TAKE WIND DATA AND POWER REQUIREMENTS FOR ANY OTHER AGRICULTURAL LOCATON, COMBINE THESE WITH WIND TURBINE CHARACTERISTICS AND DEVELOP AN ESTIMATE OF THE IMPACT OF THE WIND ENERGY CONVERSION SYSTEM (WECS) ON THE ENERGY NEEDS FOR THAT PARTICULAR APPLICATION; 3. TO DETERMINE ECONOMIC CONDITIONS THAT MUST EXIST FOR WIND GENERATED ELECTRICITY TO BE ECONOMICAL FOR INDIVIDUAL RANCHERS AND FARMERS.
SPECIFIC TASKS: THE FIRST YEAR SHALL BE USED FOR PROCUREMENT, INSTALLATION, AND SHAKEDOWN TESTS OF THE SELECTED WIND TURBINE SYSTEM. THE SECOND YEAR SHALL BE FOR EXTENDED PERFORMANCE TESTS OF THE WIND GENERATING SYSTEM AND IDENTIFICATION OF AREAS FOR POSSIBLE IMPROVEMENTS IN THE INITIAL CONFIGURATION. THE SECOND YEAR SHALL ALSO BE USED TO EVALUATE MODIFICATIONS TO THE ORIGINAL SYSTEM BASED ON WEAKNESSES IDENTIFIED DURING THE INITIAL PERFORMANCE EVALUATIONS AND THE TESTING OF THESE MODIFICATIONS.

THIS PROJECT WILL UTILIZE A GEOTHERMAL HEAT SOURCE TO PROVIDE HEAT FOR A NEW BANK BUILDING BEING BUILT IN WHITE SULPHUR SPRINGS, MT. THE SYSTEM WOULD UTILIZE HEAT EXCHANGERS TO TRANSFER HEAT FROM THE GEOTHERMAL WATER TO THE AIR HEATING SYSTEM OF THE BUILDING. THE GEOTHERMAL HEATING SYSTEM WILL CONSIST OF A 400 FOOT DEEP WELL, PUMP(S), CONNECTING PIPING, A FINNED TUBE COIL AND A REINJECTION DRY WELL OF APPROXIMATELY 100 FEET DEEP. ACCOMPLISHMENT OF THIS PROJECT WILL HELP PROVIDE LOCAL EXPERIENCE EXPERTISE FOR THOSE INVOLVED AND PROVIDE INFORMATION FOR MONTANA'S GEOLOGICAL AND GEOTHERMAL DATA BASE. (MEO)

112,000

TIME FRAME
JUNE 1975 TO JUNE 1978

LOCATION
MT - SOUTHWESTERN QUARTER WITH EMPHASIS ON ALHAMBRA-MARYSVILLE AREA

ABSTRACT
PROBLEM: THERMAL SPRINGS ARE WIDELY DISTRIBUTED IN SOUTHWESTERN MONTANA, AND REGIONAL HEAT FLOW IS HIGHER THAN NORMAL. THERMAL WATER IS BELIEVED TO UNDERLIE AN EXTENSIVE AREA, AND IT MAY BE AN IMPORTANT RESOURCE FOR DEVELOPMENT AS GEOTHERMAL-ENERGY RESEARCH AND EXPLORATION EXPAND AND AS THERMAL WATER NOT HOT ENOUGH FOR POWER GENERATION IN OPERATING PLANTS COMES INTO WIDER USE. THE MAGNITUDE OF THIS RESOURCE, AND ITS OCCURRENCE, TEMPERATURE, AND CHEMICAL CHARACTER ARE POORLY KNOWN, AND OPTIMUM DEVELOPMENT WILL REQUIRE RATIONAL EXPLORATION AND EVALUATION.
OBJECTIVE: THE OBJECTIVES OF THE STUDY ARE TO: 1. DESCRIBE THE AREAL DISTRIBUTION DEPTH OF OCCURRENCE, TEMPERATURE, AND CHEMICAL CHARACTER OF THE THERMAL WATERS IN PART OF SOUTHWESTERN MONTANA; 2. DETERMINE THE NATURE OF THE GEOLOGIC CONTROLS ON OCCURRENCE OF THE THERMAL WATERS; AND 3. DEVELOP CONCEPTUAL MODELS OF THE HYDROTHERMAL FLOW SYSTEMS, TO PROVIDE A RATIONAL BASIS FOR APPRAISAL AND POTENTIAL DEVELOPMENT OF THE RESOURCE.
APPROACH: REVIEW LITERATURE FOR DATA ON GEOLOGY, HYDROLOGY, TEMPERATURE, HYDROCHEMISTRY, AND GEOPHYSICS; 2. INVENTORY SPRINGS AND WELLS, BOTH THERMAL AND NONTHERMAL, IN THERMAL SPRING AREAS; MEASURE TEMPERATURE, CHEMICAL CHARACTER, HEAD, AND DISCHARGE PERIODICALLY AND ANALYZE TYPICAL WATERS FOR CHEMICAL LOAD; 3. STUDY GEOLOGY, PARTICULARLY STRUCTURAL FEATURES, OF THERMAL-SPRING AREAS, TO DEVELOP CONCEPTUAL MODELS OF THE HYDROLOGICAL SYSTEM; 4. DESIGN AND CARRY OUT A PROGRAM OF TEST DRILLING TO PROVIDE CRITICAL HYDRAULIC, GEOPHYSICAL, TEMPERATURE, AND HYDROCHEMICAL INFORMATION. ITEMS 3 AND 4 WILL BE COORDINATED WITH RELATED ACTIVITIES OF OTHER INVESTIGATORS MAKING GEOLOGIC AND TEMPERATURE STUDIES. (MEO)

ABSTRACT
THE OVERALL OBJECTIVE OF THE RESEARCH BY SOUTHERN METHODIST UNIVERSITY IS TO DEVELOP AN UP-TO-DATE UNDERSTANDING OF THE REGIONAL GEOTHERMAL REGIME OF THE PACIFIC NORTHWEST STATES. THIS WILL BE ACCOMPLISHED BY A FOCUS ON THREE SPECIFIC OBJECTIVES: 1. REDUCE AND INTERPRET AVAILABLE HEAT FLOW DATA IN THE FOUR-STATE REGION WHICH HAS NOT BEEN PREVIOUSLY PUBLISHED; 2. OBTAIN AND INTERPRET NEW HEAT FLOW AND MICROSEISMIC DATA IN CENTRAL IDAHO (THE IDAHO BATHOLITH) AND WEST MONTANA NEAR

BEST DOCUMENT AVAILABLE

HELENA; AND 3. SUPPORT THE INTERPRETIVE EFFORT WITH NEW CONTINUATION MODELS FOR HEAT FLOW DATA. THE LAST COMPILATION OF HEAT FLOW DATA FOR THE NORTHWESTERN U.S. WAS SIX YEARS AGO. THE AVAILABLE DATA TODAY ARE MORE ABUNDANT BY BETTER THAN AN ORDER OF MAGNITUDE. A NEW MAP WILL BE PREPARED BY THE END OF 1976. FIELD STUDIES ARE PLANNED FOR CENTRAL IDAHO BECAUSE OF A PROFUSION OF THERMAL SPRINGS AND THE SCIENTIFIC INTEREST IN THE REGION SOURCE AND DISTRIBUTION OF THE EVIDENT HEAT. STUDIES IN THE HELENA-MARYSVILLE-BROADWATER REGION OF MONTANA WILL EXPAND ON DEEP DRILLING RESULTS IN THE AREA TO DETERMINE WHETHER SURFACE THERMAL ANOMALIES ARE PRODUCED: 1. BY DEEP CIRCULATING GROUND WATER PERTURBING AN OTHERWISE NORMAL REGIONAL BACKGROUND; OR 2. BY ANOMALOUSLY HOT FORMATIONS IN THE AREA. NEW ANALYTICAL, AS WELL AS HEAT FLOW MEASUREMENT TECHNIQUES WILL BE APPLIED IN THESE STUDIES.

ABSTRACT
EXPERIMENTS ON THE MECHANICAL PROPERTIES OF SELECTED ROCK SAMPLES ARE PERFORMED UNDER PRESSURES TO 10KB AND HEATING TO 300 DEGREES C AND ON THE ELASTIC PROPERTIES OF CERTAIN ROCK AND MINERAL SAMPLES UNDER A VACUUM AND HEATING TO 1000 DEGREES C. FIELD STUDIES ARE MADE OF THE GEOTHERMAL REGIME AND OVERTHRUST FAULTING OF WESTERN MONTANA. EXPERIMENTAL RESULTS AND FIELD OBSERVATIONS ARE COMBINED IN ASSESSING SUCH PROBLEMS AS THE MECHANICS OF OVERTHRUST FAULTING, EARTHQUAKE MECHANISMS, HYDROTHERMAL WATER CIRCULATION, GEOTHERMAL ENERGY, ELASTIC PROPERTIES AND WAVE ATTENUATION IN ROCKS.

ABSTRACT
A LARGE VOLUME OF TELESEISMIC RESIDUAL DATA IS AVAILABLE FROM PERMANENT AND PORTABLE NETWORKS IN THE YELLOWSTONE AREA. WE ARE USING SEISMIC RAY-TRACING AND MATHEMATICAL INVERSION TECHNIQUES TO DELINEATE ACCURATELY THE SHAPE AND VELOCITY STRUCTURE OF THE HUGE LOW-VELOCITY BODY UNDER THE YELLOWSTONE CALDERA. PRELIMINARY RESULTS SHOW THAT THE TOP OF THE BODY IS 5-10 KM UNDER THE CALDERA, IT EXTENDS TO A DEPTH OF AT LEAST 250 KM BENEATH THE SURFACE, ITS HORIZONTAL DIMENSIONS ARE MUCH LARGER AT DEPTH THAN THE CALDERA SIZE, AND P-WAVE VELOCITY IS ABOUT 15 PERCENT LESS THAN NORMAL NEAR THE TOP OF THE BODY AND ABOUT 5 PERCENT LESS THAN NORMAL AT DEPTH. TELESEISMIC DELAYS IN THE GEYSERS-CLEAR LAKE REGION OF CALIFORNIA INDICATE THE PROBABLE PRESENCE OF A MAGMA BODY OF 1000 KM3 VOLUME TO THE NORTH OF THE GEYSERS STEAM FIELD. MICROEARTHQUAKE AND SEISMIC WAVE ATTENUATION STUDIES ARE IN PROGRESS IN YELLOWSTONE NATIONAL PARK, WYOMING, AND THE GEYERS AND COSO GEOTHERMAL AREAS, CALIFORNIA.

MT - MARYSVILLE GEOTHERMAL AREA 46 DEGREES 45' X 112 DEGRESS 22 1/2'. OTHER AREAS BEING EXAMINED INCLUDE DUNES ANOMALY, CA; RAFT RIVER, ID; BLACK ROCK DESERT, NV.
ABSTRACT
THE PURPOSE OF THIS INVESTIGATION IS TO HELP DETERMINE THE EXACT ROLE FRACTURES PLAY IN GEOTHERMAL SYSTEMS. SEVERAL GEOTHERMAL AREAS ARE BEING STUDIED AND ALL SHOW REPEATED EPISODES OF FRACTURING AND FRACTURE SEALING. THESE SYSTEMS ARE DEPENDENT ON THE FLUID CONDUCTION PATHS PROVIDED BY OPEN CRACKS. CORE SAMPLES ARE BEING EXAMINED WITH SEVERAL TECHNIQUES INCLUDING THE SCANNING ELECTRON MICROSCOPE, PETROGRAPHIC MICROSCOPE, ELECTRON MICROPROBE, DIFFERENTIAL STRAIN ANALYSIS, AND PERMEABILITY AND RESISTIVITY MEASUREMENTS. INFORMATION FROM MICROFRACTURE MORPHOLOGY, POROSITY, AND ALTERATION AND VEIN MATERIALS MAY PROVE TO BE USEFUL GUIDES IN EXPLORING FOR AND EVALUATING GEOTHERMAL AREAS AND RELATING SURFACE ANOMALIES TO PHYSICAL PROPERTIES AT DEPTH. THE MARYSVILLE GEOTHERMAL AREA IS USEFUL IN THIS STUDY BECAUSE OF THE AREA'S CHARACTERISTICS AND THE AMOUNT OF INFORMATION AVAILABLE. UNLIKE MOST GEOTHERMAL AREAS, MARYSVILLE OCCURS IN A METAMORPHIC AND INTRUSIVE IGNEOUS TERRAIN. THE MARYSVILLE SYSTEM SHOWS A STRONG DEPENDENCE ON FRACTURES. NUMEROUS REGIONAL AND LOCAL GEOPHYSICAL AND GEOLOGIC DATA AND WELL LOGS HAVE BEEN COLLECTED. FINALLY, A LARGE AMOUNT OF REPRESENTATIVE CORE SAMPLES ARE AVAILABLE. (MEO)

ABSTRACT
THE PROJECT PROPOSES TO DEMONSTRATE LOW IMPACT, COST-EFFECTIVE HYDROELECTRIC SYSTEMS. IT PROPOSES TO INSTALL SIX KW SYSTEMS IN NORTHWESTERN, MIDEASTERN, AND SOUTHWESTERN MONTANA, THEREBY PROVIDING A GENERAL ACCESSIBILITY FOR WESTERN MONTANANS WHO HAVE FLOWING WATER AS THEIR MOST ABUNDANT SOURCE OF ALTERNATIVE ENERGY. THE EXPECTED RESULT IS TO PROVIDE THREE COMPLETE 6 KW HYDRO-ELECTRIC SYSTEMS, EACH CAPABLE OF PROVIDING 17,112 KILOWATT HOURS PER YEAR. THIS PROJECT IS EXPECTED TO DEMONSTRATE THE ENVIRONMENTAL AND ECONOMIC SIGNIFICANCE OF THESE MASS-PRODUCED HYDRO-ELECTRIC POWER PLANTS. (MEC)

ABSTRACT
THE OBJECTIVE OF THIS PROJECT IS TO INSTALL 4 LOW HEAD HYDROELECTRIC SYSTEMS CAPABLE OF PRODUCING FROM 1,146 TO 2,109 KWH/MO. AT LOCATIONS TO BE CHOSEN BY THE MONTANA DEPARTMENT OF NATURAL RESOURCES AND CONSERVATION. PRELIMINARY RESEARCH INDICATES THAT THE NEWLY DEVELOPED FIXED PROPELLER TYPE (NAGLER) LOW HEAD HYDROTURBINES WHICH I.P.D. IS PROPOSING TO DEMONSTRATE WILL MORE THAN DOUBLE THE POTENTIAL NUMBER OF LOCALIZED POWER SITES WHICH WERE FORMERLY RESTRICTED TO HEADS OF 50 FEET OR MORE. THE SYSTEM DOES NOT REQUIRE THE USE OF A DAM, THUS MINIMIZING ENVIRONMENTAL IMPACT AS WELL AS INSTALLATION COSTS. THE ELECTRICAL APPLICATION OF THESE UNITS COULD BE UTILIZED ON FARMS, RANCHES, PARKS, REMOTE INDUSTRIAL OUTPOSTS (OIL PUMPING, MINING OPERATIONS, ETC.), VACATION RESORTS AND PRIVATE RESIDENCES. (MEC)

ABSTRACT
THIS IS A PROPOSAL FOR A SOLAR HEATED RESIDENCE UTILIZING SUPPLEMENTAL WOOD HEATING TO BE BUILT IN BOZEMAN. THE HOUSE IS A PASSIVE SOLAR WALL DESIGN AND WILL BE A DEMONSTRATION PROJECT. CALCULATIONS INDICATE THAT OVER 90% OF THE HEATING LOAD OF THE HOUSE WILL BE MET BY THE SOLAR/WOOD SYSTEM. SOLAR HEATING OF THE SERVICE WATER IS ALSO INCLUDED IN THE DESIGN. THE DESIGN INCORPORATES ENERGY CONSERVING FEATURES AND ALTERNATIVE ENERGY UTILIZATION SYSTEMS. THE SOLAR WALL CONCEPT HAS BEEN REFINED TO FIT THE ENVIRONMENTAL REQUIREMENTS OF MONTANA. (SOME SOLAR DESIGNS WILL NOT WORK IN MONTANA BECAUSE OF THE EXTREME LOW TEMPERATURES.) THE PHILOSOPHY OF THE ENTIRE DESIGN HAS BEEN TO MAKE THE HOUSE AND THE ALTERNATIVE ENERGY SYSTEMS AS SIMPLE AS POSSIBLE. IT IS HOPED THAT IF THIS DESIGN IS SUCCESSFUL IT COULD BE IMITATED BY OWNERS/BUILDERS. (MEO)

ABSTRACT
THE PROJECT PROPOSES TO BUILD AN ENERGY SYSTEM APPROPRIATE FOR HOMES AND SMALL COMMERICAL BUILDINGS WHICH INTEGRATES INTO ONE SYSTEM THREE RENEWABLE ENERGY SYSTEMS: WOOD, SOLAR, AND WIND. THIS DEMONSTRATION PROJECT WILL ATTEMPT TO SHOW THAT THE OFTEN DISCUSSED PHYSICAL AND ENVIRONMENTAL LIMITATIONS ON WIND, SOLAR, AND WOOD ENERGY IN W. MONTANA ARE NEITHER UNIFORMLY APPLICABLE TO ALL SITES IN W. MONTANA NOR INSURMOUNTABLE USING CURRENT, REASONABLE, LOW-LEVEL PRACTICAL TECHNOLOGY. WIND ENERGY, WHILE A SUBSTANTIAL RESOURCE IN E. MONTANA, HAS BEEN ASSUMED TO NOT BE A RESOURCE IN W. MONTANA. THE EVIDENCE WE HAVE GATHERED OVER 4 YEARS OF LIVING 800 FEET ABOVE A VALLEY FLOOR AT THE MOUTH OF A CANYON INDICATES THAT THERE ARE SUBSTANTIAL WIND RESOURCES AT CERTAIN LOCATIONS IN W. MONTANA. OUR PROJECT WOULD DEMONSTRATE AND DOCUMENT THIS.
STUDIES OF THE POTENTIAL FOR SOLAR ENERGY IN W. MONTANA HAVE BEEN LESS THAN OPTIMISTIC. THIS HAS BEEN DUE TO THE USE OF COSTS ASSOCIATED WITH COMMERCIAL, PREFABRICATED SOLAR WATER PANELS AND THE USE OF SOLAR INSOLATION DATA GATHERED, AGAIN, AT RECORDING STATIONS ON VALLEY FLOORS WHICH, DURING FALL, WINTER AND SPRING ARE OFTEN CLOUDED OVER BY GROUND FOG OR LOW LYING CLOUDS. BUILDING SITES OFF THE VALLEY FLOOR GET SUBSTANTIALLY MORE SUNSHINE DURING THE HEATING SEASON. THIS PROJECT WILL DEMONSTRATE AND DOCUMENT THE DIFFERENCE.
THE USE OF THE TREMENDOUS VOLUME OF CURRENTLY WASTED FOREST DEBRIS IN W. MONTANA TO PROVIDE ENERGY FOR SPACE HEATING FACES A MAJOR DRAWBACK--THE AIR POLLUTION ASSOCIATED WITH BURNING IT IN CONVENTIONAL WOOD STOVES AND HEATERS. HOWEVER, NEW WOOD BURNING FURNACES HAVE BEEN RECENTLY DEVELOPED WHICH AVOID THIS PROBLEM. SUCH A FURNACE WILL BE BUILT AND DEMONSTRATED.
ALL THREE OF THESE SOURCES OF RENEWABLE ENERGY WILL CHARGE A COMMON HEAT STORAGE SYSTEM WHICH IN TURN WILL BE DRAWN UPON TO HEAT THE BUILDING. THIS EFFECTIVELY INTEGRATES THEM INTO ONE SYSTEM WHICH IS NOT DEPENDENT UPON ONE SOURCE OF RENEWABLE ENERGY. (NEO)

ABSTRACT
THE MAJOR PURPOSE OF THE PROJECT IS TO STUDY THE FEASIBILITY OF USING WOOD AS A HEAT SOURCE IN CONJUNCTION WITH A HOT WATER DISTRIBUTION SYSTEM INCORPORATING A HEAT STORAGE UNIT. THE PROJECT WILL CONSIDER HOW TO HEAT A SINGLE FAMILY DWELLING USING A WOOD FIRED FURNACE EMPHASIZING THE HOME OWNER CONVENIENCE AND MORE IMPORTANT, A REDUCTION IN THE AMOUNT OF AIR POLLUTANTS PRODUCED THROUGH WOOD COMBUSTION. CARE WILL BE TAKEN TO DEVELOP A SYSTEM WHICH IS IN THE ECONOMIC REACH OF THE AVERAGE MONTANA HOME OWNER.
THIS PROJECT CAN BE CONSIDERED BOTH DEVELOPMENTAL AND DEMONSTRATION. IT IS PLANNED THAT AN ECONOMICALLY BUILT FURNACE AND AN EFFICIENT HEAT STORAGE UNIT WILL BE DEVELOPED, AND THAT THIS EQUIPMENT WILL BE TESTED THROUGH DEMONSTRATION. (MEO)

ABSTRACT
THIS PROJECT PROPOSES TO USE SUN AND WOOD AS A RENEWABLE ENERGY SOURCE TO PROVIDE THE MAJORITY PORTION OF HEATING AND DOMESTIC HOT WATER SUPPLY OF A LARGE, WELL INSULATED RURAL HOME UTILIZING WOOD FIREPLACE BOILERS. RENEWABLE ENERGY SOURCES WHICH WILL BE UTILIZED ARE LARGELY SOLAR ENERGY TO BE COLLECTED BY HOT WATER PANELS, AND WOOD TO BE BURNED IN FIREPLACES TO HEAT WATER JACKETS. WIND ENERGY WILL BE UTILIZED AS A LIMITED ALTERNATIVE THAT MAY BE USED TO STORE EITHER ELECTRICAL OR HEAT ENERGY. SOLAR ENERGY WILL BE USED TO HEAT A GREENHOUSE. (MEO)

ABSTRACT
THIS PROJECT WILL DEMONSTRATE THAT THE SUN CAN BE USED AS THE MAJOR ENERGY SOURCE FOR SPACE HEATING AND COOLING AND DOMESTIC WATER HEATING WHENEVER POSSIBLE. IT WILL ALSO SHOW THAT WOOD FUEL, WHETHER AS A BACKUP SYSTEM TO A SOLAR HEATER, OR AS THE SOLE HEAT SOURCE, CAN BE USED MUCH MORE EFFICIENTLY AND CONVENIENTLY THAN IS PRESENTLY BEING DONE, AND WITH LESS POLLUTION. THE MAJOR INNOVATIVE CONCEPTS THAT WILL BE DEMONSTRATED BY THIS PROJECT ARE: 1. A HILLSIDE AIR-TYPE SOLAR COLLECTOR, LOCATED BELOW THE HEAT STORAGE BIN, WHICH TURNS ITSELF ON AND OFF AND CIRCULATES AIR BY CONVECTION. 2. A ROCK AND CONCRETE HEAT STORAGE BIN OF UNIQUE DESIGN WHICH UTILIZES THE PRINCIPLES OF CONVECTION TO STORE AND RELEASE HEAT OBTAINED FROM A FLAT PLATE SOLAR COLLECTOR AND/OR FROM A WOOD BURNING FURNACE. 3. A WOOD BURNING FURNACE WHICH INCORPORATES SELF REGULATING FEATURES WHICH MAINTAIN EFFICIENT COMBUSTION WITH MINIMUM HEAT LOSS UP THE CHIMNEY. 4. THE COMPLETE SOLAR/WOOD HOUSE HEATING SYSTEM USES THE PRINCIPLES OF CONVECTION AND IS THUS IMMUNE TO POWER FAILURES OR ENERGY SHORTAGES. 5. THE ROOFTOP, WATER TYPE, SOLAR COLLECTOR HEATS WATER FOR DOMESTIC USES AND FOR THE POOL. IT USES NO MORE ELECTRICITY THAN WOULD BE NECESSARY TO OPERATE THE POOL FILTER PUMP. 6. THE SAME ROOFTOP SOLAR COLLECTOR ALSO OPERATES AUTOMATICALLY AS AN EXHAUST FAN TO AID SUMMER COOLING USING NO ENERGY OTHER THAN SUNLIGHT. (MEO)

ABSTRACT
THIS PROJECT WILL DEMONSTRATE THE FEASIBILITY OF APPLYING A RETROFIT COMBINATION OF SOLAR SPACE HEATING WITH A WOOD BACKUP AND INCORPORATING STORAGE FOR A TOTAL RENEWABLE ENERGY HEATING SYSTEM. THIS SYSTEM WILL CONSIST OF A RETROFIT SOLAR SPACE HEATING SYSTEM USING FLAT-PLATE AIR COLLECTORS AND A GRAVEL STORAGE TANK. THE ENERGY DELIVERED BY THE SOLAR SYSTEM WILL SUPPLY APPROXIMATELY 62% OF THE PRESENT HEATING DEMAND. THE WOOD SYSTEM WILL SUPPLY AN ADDITIONAL 23% BY BURNING 6 CORDS OF WOOD PER YEAR AT AN EFFICIENCY OF 40% TO YIELD APPROXIMATELY 85% OF THE TOTAL HEATING DEMAND SUPPLIED BY RENEWABLE ENERGY. THE REMAINDER OF THE HEATING DEMAND WILL BE SUPPLIED BY THE EXISTING NATURAL GAS FURNACE. (MEO)
STUDY AFFILIATION

ABSTRACT
THIS PROJECT PROPOSES TO PRODUCE A HOME THAT WILL DEMONSTRATE BOTH THE FEASIBILITY AND THE PRACTICABILITY OF USING A COMBINATION OF SOLAR HEATING AND WIND POWER GENERATED ELECTRICITY TO HEAT WATER FOR BOTH HEATING AND HOT WATER. IT IS ANTICIPATED THAT THE COMBINED SYSTEM SHOULD PRODUCE MORE THAN 75% OF THE HEAT NEEDED TO KEEP A HOME COMFORTABLE IN A COLD MONTANA WINTER. (MEO)

ABSTRACT
THE PROJECT IS AN INTEGRATED SYSTEM OF SOLAR, WIND AND WOOD. WOOD IS PLENTIFUL IN THE LOCATION AND WITH PROPER FOREST MANAGEMENT SHOULD ALWAYS BE. IT IS AN IDEAL BACKUP TO SOLAR AND WIND IN THIS PART OF THE COUNTRY. SOME SPECIFIC DESIGN CONSIDERATIONS ARE: 1. TO DESIGN A SMALL EFFICIENT WELL INSULATED LIVING SPACE; 2. TO DESIGN ENERGY REQUIREMENTS TO COINCIDE WITH USE; 3. TO ORIENT THE DWELLING TO MAKE MAXIMUM USE OF EXISTING ALTERNATIVE ENERGY; 4. ARCHITECTURE SHOULD REFLECT FIRST ENERGY USAGE AND EFFICIENCY, SECONDLY AESTHETICS. (MEO)

ABSTRACT
THE WIND-BORN SELF SUFFICIENT SOLAR GREENHOUSE IS A RENEWABLE ENERGY PROJECT INTEGRATING NOT ONLY WIND AND SOLAR ENERGY BUT ALSO BIOLOGICAL PROCESSES. AS SUCH, IT ADDRESSES A VARIETY OF QUESTIONS CONCERNING GREENHOUSE DESIGN MANAGEMENT AND ENERGY BUDGETING. THE FOLLOWING POINTS WILL BE ADDRESSED: RESEARCH: 1. WHAT IS THE RELATIONSHIP BETWEEN WIND SPEED AND SOLAR INTENSITY? CAN AN INTEGRATED SYSTEM EFFECTIVELY ADDRESS THE PROBLEMS OF ENERGY VARIATION AND STORAGE? 2. TO WHAT EXTENT ARE INTERIOR CLIMATE FLUCTUATIONS CONTROLLABLE GIVEN THE ENERGY INPUTS AND CONTROL MECHANISMS SPECIFIED, AND WHAT EFFECTS WILL ALL THIS HAVE ON PLANT VIABILITY? 3. PRODUCTION OF HEAT, CO2 AND FERTILIZER WILL BE BY AEROBIC DIGESTION. THESE BY-PRODUCTS WILL BE MEASURED AND THE CHARACTERISTICS OF THEIR INTERACTIONS WITH PLANT LIFE ANALYZED. 4. ENERGY INPUTS AND REQUIREMENTS WILL BE MONITORED ON A DAILY BASIS. 5. LABOR INPUT WILL BE NOTED AND THE ECONOMIC/NET ENERGY ASPECTS TABULATED AT THE END OF THE YEAR.
DEVELOPMENT: WE INTEND TO DEVELOP AN INTEGRATED GROWING ENVIRONMENT POWERED BY: 1. DIRECT SOLAR RADIATION. HEAT WILL BE STORED PASSIVELY IN WATER CONTAINERS, EARTH AND CONCRETE. 2. WIND POWERED ELECTRICITY GENERATION. THE ELECTRICITY WILL BE UTILIZED BY WATER PUMPING WIDE SPECTRUM GROWING LIGHTS, EMERGENCY AIR EXHAUST. 3. WIND AND THERMAL POWERED AIR EXHAUST SYSTEM. 4. SOLAR FOOD DEHYDRATION. 5. SOLAR HOT WATER PRODUCTION. 6. AUXILIARY WOOD HEAT. 7. CO2 HEAT, AND FERTILIZER PRODUCTION BY AEROBIC DECOMPOSITION. (MEO)

ABSTRACT
THIS PROJECT WILL CONSTRUCT A SOLAR GREENHOUSE ON THE SOUTH SIDE OF AN EXISTING HOME AND ALSO INSTALL A WOOD HEATER WHICH WILL WORK IN CONJUNCTION WITH THE GREENHOUSE IN PROVIDING HEAT FOR BOTH UNITS. THE COMBINATION OF THESE TWO INSTALLATIONS IS EXPECTED TO PROVIDE UP TO 98% OF THE SPACE HEATING REQUIREMENTS OF THE HOME DUE TO THE IDEAL CONFIGURATION OF THE HOUSE FLOOR PLAN. THE GREENHOUSE WILL ALSO PROVIDE AN ENVIRONMENT FOR THE GROWING OF FOOD ON A YEAR ROUND BASIS. (MEO)

ABSTRACT
THIS PROJECT IS TO CONSTRUCT AND DEMONSTRATE A WOOD BURNING FURNACE AT THE I.P.D. FACTORY NEAR NOXON, MONTANA WHICH WILL EFFICIENTLY PROVIDE WINTER HEAT FOR A BUILDING HOUSING AN AREA OF 2,560 SQUARE FEET IN AN AIR SPACE OF 44,800 CUBIC FEET. THE WOOD HEATER WHICH I.P.D. PROPOSES TO BUILD AND DEMONSTRATE IS OF THE BASEMENT FURNACE VARIETY BUT ON A RESIDENTIAL SCALE. IT IS HOPED THAT THIS FURNACE CAN EQUAL OR SURPASS THE COMBUSTION EFFICIENCY OF ANY WOOD BURNER ON THE MARKET TODAY. (MEO)

ABSTRACT
THIS PROJECT WILL ATTEMPT TO MAKE EXISTING FIREPLACES MORE EFFICIENT BY UTILIZING A CAST IRON STEAM RADIATOR IN THE FIREPLACE BOX AND CIRCULATING WATER THROUGH THE RADIATOR. TWO PARAMETERS WILL BE USED TO MEASURE THE EFFICIENCY OF THE SYSTEM. ONE WILL DETERMINE THE RATE OF HEAT DISSIPATION WITH ONE ZONE OPEN, RELATIVE TO TIME, OF THE BOILER TEMPERATURE WITH AND WITHOUT THE UTILIZATION OF THE ADJUNCT SYSTEM. THE SECOND WILL COMPARE THE VOLUME OF NATURAL GAS USED FOR THE PAST TWO YEARS FOR THE WEEKEND DAYS OF OCTOBER THROUGH MARCH TO THAT UTILIZED DURING THE TEST PERIOD. IT IS ANTICIPATED THAT THIS PROJECT WILL DECREASE MARKEDLY THE USAGE OF A NON-RENEWABLE FUEL, NATURAL GAS, WHICH IS IN EXTREMELY SHORT SUPPLY AND WILL RECYCLE DISCARDED CAST IRON RADIATORS. (MEO)

ABSTRACT
THE PURPOSE OF THIS STUDY IS TO DETERMINE THE FEASIBILITY OF THE CONVERSION OF WHEAT AND BARLEY INTO ALCOHOL, CREATING BOTH A NEW USE OF MONTANA WHEAT AND BARLEY AND A VIABLE ALTERNATIVE ENERGY SOURCE. SINCE THERE HAS ALREADY BEEN A GREAT DEAL OF STUDY ON THE CONVERSION OF GRAIN INTO ALCOHOL IN OTHER STATES, THIS PROJECT WILL CONCENTRATE ON THE ECONOMIC FEASIBILITY OF SUCH A PROCESS AND EXPLORE ALTERNATIVE METHODS OF FUNDING SUCH ACTION. IT WILL ALSO EXPLORE THE DESIRABILITY OF A PRODUCER CHECK-OFF TAX AS A METHOD OF FUNDING ANY PROPOSED CONVERSION FACILITY. IN ADDITION, THERE WILL BE COOPERATIVE EFFORTS WITH OTHER STATES INTERESTED IN THE RESEARCH DEVELOPMENT OF SUCH FACILITIES. (NEO)

ABSTRACT
THIS STUDY IS DIRECTED AT IDENTIFYING SOME OF THE EXISTING AND EMERGING ISSUES, PROBLEMS AND CONFLICTS THAT MAY ARISE IN THE PLANNING AND SITING OF ELECTRICAL ENERGY FACILITIES IN THE WINW REGION. MORE SPECIFICALLY, THE NRC CONTRACT SET OUT TWO OBJECTIVES OF THE PROJECT, TO WIT: 1. THE IDENTIFICATION AND ASSESSMENT OF CURRENT AND EMERGING ISSUES AND PROBLEMS THAT ARE PRIMARILY OF A MULTI-STATE, REGIONAL, NATURE CONCERNING THE SITING AND PLANNING OF NUCLEAR AND OTHER ELECTRICAL ENERGY FACILITIES IN THE WESTERN REGION OF THE UNITED STATES; AND 2. PREPARATION OF RECOMMENDATIONS AND ALTERNATIVE COURSES OF ACTION BY STATE, FEDERAL, AND REGIONAL AGENCIES FOR STREAMLINING THE REGULATORY AND DECISION-MAKING PROCESSES INVOLVED IN THE SITING OF NUCLEAR AND OTHER ELECTRIC ENERGY FACILITIES. ABSTRACT
THE PURPOSE OF THE HSSR OF THE NURE PROGRAM IS TO AID IN THE EVALUATION OF THE NATION'S URANIUM RESOURCES AND IDENTIFY AREAS OF INTEREST FOR URANIUM EXPLORATION. THE LASL IS CARRYING ON RECONNAISSANCE SAMPLING OF SURFACE WATERS, GROUND WATERS, STREAM AND LAKE SEDIMENTS THROUGHOUT THE STATES OF NEW MEXICO, COLORADO, ALASKA, WYOMING, AND MONTANA. THE AVERAGE SAMPLING DENSITY IN THE STATE OF MONTANA IS ONE SAMPLE PER TEN SQUARE KILOMETERS (FOUR SQUARE MILES).
WHILE MANAGEMENT, PLANNING, SAMPLE ANALYSIS, DATA HANDLING, EVALUATION, AND REPORTING ARE DONE BY BY LASL AT LOS ALAMOS, NM, SAMPLING IS DONE BY PROFESSIONAL CONTRACTORS THROUGHOUT THE STATES INVOLVED. IN ADDITION TO THE RECONNAISSANCE SURVEYS, STATE UNIVERSITIES ARE CONTRACTED TO STUDY THE EFFECTS OF DIFFERENT SAMPLING PROCEDURES, SEASONAL VARIATIONS, AND SAMPLING DENSITIES. THE UNIVERSITY OF MONTANA AT MISSOULA IS PRESENTLY CONDUCTING TWO SUCH PILOT SURVYES IN THE WESTERN PART OF THE STATE.
RESULTS OF THE RECONNAISSANCE AND PILOT SURVEYS WILL BE RELEASED TO THE PUBLIC AS SOON AS POSSIBLE. THE REPORTS WILL CONTAIN URANIUM CONCENTRATION OVERLAYS COVERING AREAS GENERALLY CONFORMABLE TO THE USGS 1:250,000 TOPOGRAPHIC MAP BOUNDARIES. THE MAIN PURPOSE OF THE REPORTS IS TO PRESENT DATA AND THE CONDITIONS UNDER WHICH IT WAS GATHERED. THE BULK OF DATA EVALUATION IS LEFT TO THE PRIVATE SECTOR, BUT THE DATA CAN BE USED AS AN AID IN THE EVALUATION OF URANIUM RESOURCES AND TO DELINEATE AREAS OF GREATEST INTEREST FOR URANIUM ORE EXPLORATION. (MEO)
REPORTS AND PUBLICATIONS
LASL QUARTERLY PROGRESS REPORTS FOR THE HSSR PROGRAM, AS WELL AS ALL REPORTS OF RECONNAISSANCE RESULTS, CAN BE OBTAINED THROUGH THE ERDA GRAND JUNCTION OFFICE, GRAND JUNCTION, COLORADO. REPORTS ARE NOW BEING PREPARED FOR THOSE AREAS IN WHICH SAMPLING HAS BEEN COMPLETED.

U.S. GEOLOGICAL SURVEY, GEOLOGIC DIV.
TIME FRAME
JULY 1975 TO JUNE 1976
LOCATION
WY CO TX WA
ABSTRACT
THE OVERALL OBJECTIVE OF THIS PROGRAM IS TO CONDUCT FUNDAMENTAL RESEARCH ON THE APPLICATION OF SURFACE ELECTROMAGNETIC METHODS TO PROSPECTING FOR URANIUM DEPOSITS. ADVANCES IN ELECTROMAGNETIC THEORY (NUMERICAL MODELING OF COMPLEX EARTH STRUCTURES) AND IN FIELD INSTRUMENTATION HAVE MADE DETECTION AND INTERPRETATION OF SUBTLE ANOMALIES POSSIBLE. ACCORDINGLY, THE PROJECT IS STRUCTURED TO TAKE ADVANTAGE OF THESE ADVANCES IN APPLICATIONS TO EXPLORATION FOR VARIOUS TYPES OF URANIUM DEPOSITS. THE OVERALL OBJECTIVE GIVEN ABOVE WILL BE ACCOMPLISHED THROUGH A COMBINATION OF LABORATORY WORK, FIELD SURVEYS AND COMPUTER ANALYSIS. THE RESEARCH CAN BE DIVIDED INTO FOUR MAJOR RESEARCH AREAS AS FOLLOWS: 1. DETERMINATION OF WHETHER MEANINGFUL GEOPHYSICAL ANOMALIES EXIST ON A LIMITED SCALE FOR VARIOUS GRADES AND/OR TYPES OF URANIUM DEPOSITS; 2. SIMULATED AND/OR ACTUAL EXPLORATION FOR URANIUM DEPOSITS INVOLVING MORE THAN RECONNAISSANCE EFFORTS; 3. INSTRUMENT DEVELOPMENT, TESTING AND REFINEMENT; AND 4. IMPLEMENTATION OF COMPUTER PROGRAMS FOR DATA PROCESSING AND INTERPRETATION. FOR FY-76 THE FOLLOWING MAJOR REPORTS ARE EXPECTED TO BE COMPLETED DEALING WITH THE FOLLOWING SUBJECTS OR TOPICS: 1. THE ELECTROMAGNETIC SIGNATURE OF SELECTED URANIUM DEPOSTS; 2. INVERSION OF AMT DATA; 3. INVERSION OF IP AND RESISTIVITY DATA; 4. A CONTOURING PACKAGE FOR IP DATA; AND 5. MISCELLANEOUS OPEN FILE REPORTS ON SPECIFIC SURVEY AREAS.

ABSTRACT
THE CENTER FOR INNOVATION (A DIVISION OF MERDI) IS RESPONSIBLE FOR ASSISTING THE INVENTOR/ENTREPRENEUR WITH ANY AND ALL PHASES OF THE INNOVATION PROCESS--FROM CONCEPTION TO MARKETING--TO ENSURE THE HIGHEST QUALITY OUTCOMES FOR THE SMALLEST INVESTMENT OF FUNDS AND RESOURCES. ONE OF THE MOST IMPORTANT FUNCTIONS OF THE CFI IS HELPING THE SMALL BUSINESSMAN AND/OR INVENTOR SECURE FEDERAL, STATE, OR PRIVATE FUNDS AND OTHER FORMS OF INSTITUTIONAL SUPPORT FOR SPECIFIC PROJECTS THAT SHOW TECHNICAL PROMISE AND ECONOMIC DEVELOPMENT POTENTIAL. FURTHERMORE, THE CFI EXPECTS TO SUPPLY THE ESSENTIAL SERVICES DIRECTLY TO THE INVENTOR WITHIN HIS OR HER OWN COMMUNITY.
THE CFI WILL PROMOTE THE DEVELOPMENT AND INTRODUCTION OF ALTERNATIVE TECHNOLOGY. THE PURPOSE OF THE CENTER WILL BE TO GENERATE PROJECTS WHICH TRANSLATE INTO SMALL BUSINESS APPLICATIONS THAT PRODUCE AND MARKET NEWLY DEVELOPED TECHNOLOGY UTILIZING RENEWABLE ENERGY RESOURCES. (MEO)

ABSTRACT
THIS CODE WAS AN OUTGROWTH OF A CONFERENCE WHICH WAS HELD BY THE ROOSEVELT-CUSTER REGIONAL COUNCIL ON MARCH 3, 1977. THE CONFERENCE WAS A FORUM FOR LOCAL COUNTY OFFICIALS ON PROBLEMS RELATED TO MINERAL EXPLORATION AND PRODUCTION AND WAS ATTENDED BY SEVEN LOCAL COUNTY COMMISSIONS. REPRESENTATIVES OF STATE AND FEDERAL AGENCIES WERE INVOLVED IN MINERAL ACTIVITIES AS WELL AS NUMEROUS PRIVATE ENERGY CONCERNS AND LOCAL LANDOWNERS. THE FORUM FOCUSED ON PROBLEMS EXPERIENCED WITH MINERAL EXPLORATION AND DEVELOPMENT, AND POSSIBLE SOLUTIONS TO THESE PROBLEMS. ONE OF THE PROBLEMS DISCUSSED WAS THE LACK OF COMPREHENSIVE REGULATIONS REGARDING MINERAL EXPLORATION AND DEVELOPMENTS WITHIN THE REGION. THE COUNTY REPRESENTATIVES FELT IT WOULD BE BENEFICIAL TO HAVE SOME SORT OF UNIFORM BASIS BY WHICH EACH COUNTY COULD FORMULATE THEIR OWN RESPECTIVE MINERAL CODE.
THIS MODEL MINERAL CODE IS IN RESPONSE TO THE COUNTIES REQUEST TO THE REGIONAL COUNCIL. THE CODE IS A MODEL, AND AS SUCH CAN BE ACCEPTED AND ADOPTED IN TOTAL OR IN PART, OR TO BE REJECTED IN TOTAL OR IN PART AS THE INDIVIDUAL COUNTIES SO DESIRE. OBJECTIVE: TO REDUCE THE VOIDS AND PROBLEMS REGARDING MINERAL EXPLORATION AND PRODUCTION AND PROVIDE A MEANS FOR ORDERLY DEVELOPMENT WITHIN A COUNTY.

ABSTRACT
SURVEY OF THE EMERGING ISSUES ASSOCIATED WITH SPLIT SURFACE AND SUBSURFACE MINERAL ESTATES DEVELOPED FROM THE PERSPECTIVE OF THE MINING INDUSTRY PROBLEMS ARISING FROM THE SEPARATION OF SURFACE AND MINERAL ESTATES WHERE BOTH ESTATES ARE OWNED BY PRIVATE INDIVIDUALS. STATES OR COUNTIES WILL BE IDENTIFIED AND INVESTIGATED. THE EFFECTS OF THE PRIVATE-PRIVATE SEVERED ESTATE PROBLEM ON NATIONAL MINERAL SUPPLY, THE MINING INDUSTRY AND PRIVATE MINERALS OWNERS WILL BE IDENTIFIED.

ABSTRACT
THE PURPOSE OF THIS PROJECT IS TO EXAMINE THE POTENTIAL ENGINEERING AND ECONOMIC FEASIBILITY OF THREE SMALL HYDROELECTRIC PROJECTS TO BE LOCATED AT EXISTING DAMS UNDER THE ADMINISTRATION OF MONTANA'S DEPARTMENT OF NATURAL RESOURCES AND CONSERVATION. THE PROJECTS WERE SELECTED FROM STATISTICAL DATA ON FORTY WATER CONSERVATION PROJECTS WHICH HAD BEEN COMPILED IN A REPORT PREPARED BY THE DNRC IN MARCH 1977. SITES LOCATED ON THREE SEPARATE DRAINAGE SYSTEMS WERE SELECTED FOR REVIEW OF THEIR HYDROELECTRIC POTENTIAL. A SCHEME OF DEVELOPMENT FOR EACH SITE #AS PREPARED FOR THE PROPOSED POWER FEATURES ALONG #ITH MODIFICATIONS TO THE EXISTING FACILITIES WHERE REQUIRED. AN ASSESSMENT OF THE POTENTIAL ENERGY THAT COULD BE GENERATED AT EACH SITE WAS COMPUTED BASED ON HYDROLOGICAL RECORDS AND PHYSICAL CHARACTERISTICS OF THE SITE. A COMPUTER PROGRAM. SIMULATING THE SEASONAL FLOW CHARACTERISTICS OF THE WATERSHED AND OPERATION OF THE PLANTS. #AS USED TO PERFORM THE ENERGY STUDIES. FOR THE THREE PROJECTS COMBINED. POTENTIAL GENERATION OF 105 MILLION KILOWATT-HOURS WOULD HAVE AN ESTIMATED MARKET VALUE IN EXCESS OF $2.700.000 ANNUALLY. THIS GENERATION IS THE EQUIVALENT OF UTILIZING ABOUT 60.000 TONS OF COAL IN A MODERN COAL-FIRED STEAM ELECTRIC GENERATING STATION. POTENTIAL MARKETS FOR THIS POWER #ERE IDENTIFIED IN THIS STUDY AND MEANS OF DELIVERY OF THE ENERGY TO THE POWER PURCHASER. SMALL ENTITIES MAY BE DESIROUS OF OBTAINING POWER FROM THESE INSTALLATIONS #ITH THE DECLINING AVAILABILITY OF POWER FROM THE GOVERNMENT PROJECTS. (MEO)

ABSTRACT
IMAGE ANALYSIS. AIDED BY COMPUTER. ELECTRONIC. AND OPTICAL ENHANCEMENT TECHNIQUES. #ILL BE APPLIED TO IDENTIFY POSSIBLE STRUCTURAL ELEMENTS IN #YOMING AND TEXAS URANIUM AREAS. A #YOMING COAL AREA. AND A COLORADO METAL-MINING DISTRICT. THE NATURE OF MANY OBSERVED PHOTO-GEOLOGIC LINEAMENTS #ILL BE DETERMINED IN THE FIELD. CONTINUED EFFORT #ILL BE DEVOTED TO ENHANCEMENT METHODS IN ORDER TO DEFINE #AYS TO INCREASE THE OBJECTIVITY OF LINEAMENT MAPPING.

ORGANIZATION INDEX

The Organization Index contains uniform names of all organizations included in the project descriptions. Government agencies listed in the Organization Index are prefaced by the organization's affiliation; for example, South Dakota Office of Energy Policy, and U.S. Bureau of Land Management, EMRIA.

SUBJECT INDEX

The terms listed in the Subject Index are taken from thesauri of energy descriptors and supplemented by terms from the title and abstract of the project description.

In addition, the Subject Index contains location names such as cities, counties, mine sites, river basins, and geographic formations. State location names can be found in the Location Index.
